Biology Neil A. Campbell, Jane B. Reece, 2005 Neil Campbell and Jane Reece's *BIOLOGY* remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept, and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter.

Essentials of Genetics William S. Klug, Michael R. Cummings, 2002 For courses in Genetics found in biological sciences, agriculture, forestry, and health sciences. *Essentials of Genetics* presents a succinct, less detailed overview of the discipline with balanced coverage of both classical and modern genetics. Known for their clear writing style, emphasis on concepts, visual art program, and thoughtful coverage of all areas of genetics, the authors capture students' interest with up-to-date coverage of cutting edge topics and research. This text will help students connect the science of genetics to the issues of today through interesting and thought-provoking applications.
