

Chapter 1: The Living World

Question 1. Why are living organisms classified?

Answer: There is a vast variety of organisms which differ very greatly in their form, structure and mode of life. To find out a desired organism of known characters from vast array of plants and animals, the organisms must be classified.

Question 2. Why are the classification systems changing every now and then?

Answer: Millions of plants, animals and organisms are found on earth. Many of these have been identified by the scientists while many new species are still being discovered around the world. Therefore, to classify these newly discovered species new systems of classification have to be devised every now and then. This creates the requirement to change the existing systems of classification.

Question 3. What different criteria would you choose to classify people that you meet often?

Answer: The various criteria that may be chosen to classify people include

- Morphotaxonomy
- Numerical taxonomy
- Behaviour and
- Geographical distribution.

Question 4. What do we learn from identification of individuals and populations?
