## **Community Creating Guide Hunt Questing Treasure:**

*Questing* Delia Clark, Steven Glazer, 2004 A guide to creating treasure hunts that teach and share the special places in your community

*The Ecology of School* David Zandvliet, 2013-11-08 This book describes and documents one school's experiences in achieving their environmental literacy goals through the development of a place based learning environment. Through this initiative a longitudinal descriptive case study began at the Bowen Island Community School to both support and advocate for ecological literacy while helping the school realize its broad environmental learning goals. Conceptualised as an intensive case study of a learning environment with an environmental education focus the program was part of a larger ecological literacy project conducted in association with preservice and graduate education programs at a nearby university and research centre. Following both empirical learning environments and participatory ethnographic research methods the project is described from a variety of perspectives: students, teachers, teacher educators, researchers, and administrators. The volume describes a variety of forms of place based education that teachers devised and implemented at the school while giving evidence of the development of a supportive and positive place based learning environment. The programs and initiatives described in this volume provide the reader with insights for the development of place based programming more generally. The final chapter outlines participatory methods and action research efforts used to evaluate the success of the project and recounts the development and validation of a learning environment instrument to assist with this process. The new instrument coupled with qualitative descriptions of the learning environment experienced by many at the school give unique insights into the various ways the study of learning environments as a methodology may be explored.

*Childhood and Nature* David Sobel, 2025-03-15 *Childhood and Nature* is a guide for educators looking to foster in their students a love of nature as well as an understanding of complex environmental issues. This second edition brings new material and fresh insights to David Sobel's foundational exploration of place based education. Sobel articulates seven design principles that teachers can use to build learning experiences: adventure, fantasy, and imagination; animal allies; maps and paths; special places; small worlds; and hunting and gathering. Pulling from recurrent play themes and real world examples from educators, Sobel details place based projects and lessons for each principle. Students learn and develop vital skills through engagement with their local environments and communities. Miniature ecosystems in the small world of a sandbox, for example, can help children grasp larger abstract ideas. A timely and actionable resource, *Childhood and Nature* shows how centering the world around us in education can create a generation of nature students, explorers, and protectors.

*Teaching Green -- The Elementary Years* Tim Grant, Gail Littlejohn, 2005-05-01 A complete resource for teaching green to young people from kindergarten through grade five.

**Pacific CRYSTAL Centre for Science, Mathematics, and Technology Literacy: Lessons Learned** Larry D. Yore, Eileen Van der Flier-Keller, David W. Blades, Timothy W. Pelton, David B.
