Contemporary Theories Of Knowledge Joseph Cruz:

Contemporary Theories of Knowledge John L. Pollock, Joseph Cruz, 1999 This exciting new edition of the classic Contemporary Theories of Knowledge has been significantly updated to include analyses of the recent literature in epistemology In addition a new case is made for the strong connection between epistemology and artificial intelligence as Pollock and Cruz argue that a necessary condition for the correctness of any epistemological theory is that it be possible to build an implemented artificial intelligence system on the basis of it Like the first edition Contemporary Theories of Knowledge Second Edition is an excellent teaching tool introducing the reader to the fundamental issues and approaches in the field of epistemology Theory Of Knowledge Keith Lehrer, 2018-02-06 In this impressive second edition of Theory of Knowledge Keith Lehrer introduces students to the major traditional and contemporary accounts of knowing Beginning with the traditional definition of knowledge as justified true belief Lehrer explores the truth belief and justification conditions on the way to a thorough examination of foundation theories of knowledge the work of Platinga externalism and naturalized epistemologies internalism and modern coherence theories contextualism and recent reliabilist and causal theories Lehrer gives all views careful examination and concludes that external factors must be matched by appropriate internal factors to yield knowledge This match of internal and external factors follows from Lehrer s new coherence theory of undefeated justification In addition to doing justice to the living epistemological traditions the text smoothly integrates several new lines that will interest scholars Also a feature of special interest is Lehrer s concept of a justification game This second edition of Theory of Knowledge is a thoroughly revised and updated version that contains several completely new chapters Written by a well known scholar and contributor to modern epistemology this text is distinguished by clarity of structure accessible writing and an elegant mix of traditional material contemporary ideas and well motivated innovation American Journal of Islamic Social Sciences 29:4 Farhan Chak, Habib Ahmed, Bella A. foundationalism were crafted that were claimed to be immune to the earlier criticisms This volume contains 12 papers in which various aspects of this dialectic are covered A number of papers continue the trend to defend foundationalism and foundationalism's commitment to basic beliefs and basic knowledge against various attacks Others aim to show that one important objection against coherentism viz that the notion of coherence is too vague to be useful can be countered

Dissolving the Gettier Problem John Ian K. Boongaling, 2020-11-18 This book argues that a complete dissolution of the Gettier problem is possible using Jaakko Hintikka's Socratic Epistemology with its emphasis on questioning as a knowledge seeking procedure The key to accomplishing this task is to treat Gettier's counterexamples as a game of inquiry where epistemic agents deal with various pieces of information employ different moves and make different choices or strategies such as bracketing or unbracketing an item of information in determining for themselves what to believe in or what they can claim to have knowledge of This book will appeal to both undergraduate and graduate students as well as post graduate researchers as it offers a novel perspective for understanding the Gettier problem and a cogent explanation for the failures of previously proposed solutions to it All this is made possible by going beyond analysis and dealing with the experiences of epistemic agents in actual problem solving scenarios **The Philosopher's Annual**, 2002 **Naturalism Defeated?**

James K. Beilby, 2002 Plantinga's argument is aimed at metaphysical naturalism or roughly the view that no supernatural beings exist Naturalism is typically conjoined with evolution as an explanation of the existence and diversity of life Plantinga's claim is that one who holds to the truth of both naturalism and evolution is irrational in doing so More specifically because the probability that unguided evolution would have produced reliable cognitive faculties is either low or inscrutable one who holds both naturalism and evolution acquires a defeater for every belief he/she holds including the beliefs associated with naturalism and evolution **The Bulletin of the Hegel Society of Great Britain**, 1998 *Ultimate Questions* Nils Ch
