Defence Psychometric Test Procedure:

Race, Culture and Mental Illness in the International Criminal Court's Ongwen Judgment: Biases and Blindspots Beth S. Lyons, 2024-12-18 Dominic Ongwen was abducted in 1987 when he was 8 or 9 years old by the Lord's Resistance Army LRA in Northern Uganda and trafficked as a child soldier. He made multiple unsuccessful attempts to escape and finally succeeded in late 2014. He turned himself into the International Criminal Court in 2015 and was prosecuted. Mr Ongwen's defence was that he was not responsible for the crimes of the LRA based on his mental illnesses and duress stemming from his abduction and subsequent coercion and indoctrination under Joseph Kony within the LRA. In February 2021 the ICC's Trial Chamber IX convicted Dominic Ongwen of 61 charges and two modes of liability and he was sentenced to 25 years incarceration. This work critiques the judicial racial and cultural biases and blindspots in the Ongwen Judgment rendered by the ICC as related to the affirmative defences of mental disease or defect and duress and to sentencing from the perspective of the author who served as a defence counsel in the case.

Integrating Research Methods and Statistics for Behavioural Sciences Siu L. Chow, 2023-11-16 This book shows why and how the concepts control and happenstance are crucial to methodology and statistics respectively. Control as a means to reduce ambiguity fulfills its function because of inductive rules. Statistical null hypothesis renders it possible to use test of statistical significance to rule out happenstance as an explanation of research result. This book shows why and how the concepts control and happenstance are crucial to methodology and statistics respectively. Control as a means to reduce ambiguity fulfills its function because of inductive rules. Statistical null hypothesis renders it possible to use tests of statistical significance to rule out happenstance as an explanation for research results. Basic concepts of descriptive statistics are introduced in the context of data collection, tabulation, derivation and standardization. Issues related to psychometric measurement, correlation and regression are thereby explained as well. Random sampling distribution renders possible inferential statistics viz confidence interval, parameter estimation, hypothesis testing and goodness of fit. The book shows how standardizing random sampling distribution gives rise to parametric tests. In short, this book shows that research impartiality is possible despite the belief in as well as instances of beauty is in the eye of the beholder.

Handbook of Military Psychology Stephen V. Bowles, Paul T. Bartone, 2017-12-05 This expert compendium surveys the current state of military psychology across the branches of service at the clinical, research, consulting and organizational levels. Its practical focus examines psychological adjustment pre and post deployment, commonly encountered conditions e.g. substance abuse and the promotion of well-being, sleep, mindfulness and resilience training. Coverage pays particular attention to uses of psychology in selection and assessment of service personnel in specialized positions and training concerns for clinicians and students choosing to work with the military community. Chapters also address topics of particular salience to a socially conscious military including PTSD, sexual harassment and assault, women's and LGBT issues, suicide prevention and professional ethics. Among the specific chapters

topics covered Military deployment psychology psychologists in the forward environment Stress and resilience in married military couples Assessment and selection of high risk operational personnel processes procedures and underlying theoretical constructs Understanding and addressing sexual harassment and sexual assault in the US military Virtual reality applications for the assessment and treatment of PTSD Plus international perspectives on military psychology from China Australia India and more Grounding its readers in up to date research and practice Military Psychology will assist health psychologists clinical psychologists psychiatrists and clinical social workers in understanding and providing treatment for military populations veterans and their families as well as military psychologists in leadership and consulting positions

Forensic Neuropsychology in Practice Susan Young, Michael Kopelman, Gisli Gudjonsson, 2009-06-25 Clinical psychologists are increasingly asked to prepare reports for legal purposes often outside the scope of their own area These might involve the mental state or neuropsychological effects of an injury to their client or to a third party This is a practical reference text for those working in these important areas of forensic consultancy **Abstracts 7103-9613**, 1988

Therapeutic Communities for Offenders Eric Cullen, Lawrence Jones, Roland Woodward, 1997-06-19 The articles in this collection describe examples of best practice that therapeutic communities offer to offenders in the United Kingdom Europe and the United States Practical comparisons are made and the emphasis is on jargon free practical guides and descriptions of requisite skills procedures and organizations to allow readers to understand how to build and sustain therapy in prisons **Fitness to Plead** Ronnie Mackay, Warren Brookbanks, 2018-06-20 The law relating to fitness to plead is an increasingly important area of the criminal law While criminalization may be justified whenever an offender commits a sufficiently serious moral wrong requiring that he or she be called to account the doctrine of fitness to plead calls this principle into question in the case of a person who lacks the capacity or ability to participate meaningfully in a criminal trial In light of the emerging focus on capacity based approaches to decision making and the international human rights requirement that the law should treat defendants fairly this volume offers a benchmark for the theory and practice of fitness to plead providing readers with a unique opportunity to consider differing perspectives and debate on the future development and direction of a doctrine which has up till now been under discussed and under researched The fitness to plead rules stand as an exception to notions of public accountability for criminal wrongdoing yet despite the doctrine's long standing function in criminal procedure it has proven complex to apply in practice and has given rise to many varied legislative models and considerable litigation in different jurisdictions Particularly troublesome is the question of what is to be done with someone who has been found unfit to stand trial Here the law is required to balance the need to protect those defendants who are unable to participate effectively in their own trial whether permanently or for a defined period and the need to protect the public from people who may have caused serious social harm as a result of their antisocial behaviour The challenge for law reformers legislators and judges is to create rules that ensure that everyone who can properly be tried is

tried while seeking to preserve confidence in the fairness of the legal system by ensuring that people who cannot properly engage in the criminal trial process are not forced to endure it

Stress and Coping in Nursing Roy D. Bailey, Margaret Clarke, 1989 Increasingly stress as a concept is being used as an explanation of a wide variety of negative phenomena which are experienced by all people but which include nurses in particular and their patients Nursing has been identified as a high stress profession and one can hardly pick up a nursing journal or even read a newspaper article about nursing without finding the word stress used liberally Examples of its use are found in relation to sickness absence rates high level of nursing staff turnover discontent in nursing the effects of unemployment the effects of overwork having too much responsibility having too little responsibility or control the effects of constantly giving emotionally to others the causes of illness the effects of going into hospital delayed

healing anxiety depression and alcoholism Given the heterogeneous nature of these phenomena some of which are the diametric opposite of others and that they are clearly being attributed to the one concept stress then that concept must necessarily be of importance within people's lives Or is it perhaps just a fashionable global but ultimately empty explanation Roy Bailey and I believe that stress is an extremely important concept Indeed we would argue that it is a meta concept rather than a concept which does indeed serve to explain many disparate phenomena
