Vertebrates Norman K. Wessels, Elizabeth M. Center, 1992-05 Film & Video Finder, 1997 Student Ownership Lewis M. Willian, Rocky Wallace, 2018-06-13

Student Ownership details a specific set of strategies used by a case study school to effectively triple the school's number of college and or career ready students over a two year period. The school moved from the bottom 5 percent in the state in transition readiness for students to the top 5 percent by implementing strategies that helped the students take ownership of their futures by implementing these strategies. In addition, companion strategies are included that were used to change the minds of the teachers and administrators in order to establish ownership in the minds of their students. This book will help you establish student empowerment and ownership of their learning in your school culture. *Carolina Science and Math* Carolina Biological Supply Company, 2003 The Dissection of the Shark (The Dogfish, *Squalus Acanthias*) Bruce Magill Harrison, 1958 **Advanced Veterinary Topics in Elasmobranchs** Natalie D. Mylniczenko, Alexa Delaune, Alisa Newton, 2025-05-22

Elasmobranchs are a unique group of fishes which are highly emphasized at aquariums; they are a guest favourite and of high interest to the general public. Veterinarians working with sharks, rays, and occasionally chimaeras find themselves challenged because of the wide diversity within the group and the lack of widely published information available in veterinary medicine. This special edition aims to do several things:

- 1 significantly contribute data to a generally low publication taxon
- 2 offer unique case series of disease to help clinicians with diagnosis of disease
- 3 increase the quality of diagnostics available to veterinarians to improve their case management
- 4 provide a central location for quality research on elasmobranch veterinary medicine

Elasmobranch veterinary care is a poorly published topic; yet there are many clinicians doing quality work in shark and ray medicine. This special topic provides an impetus for those clinicians to contribute their research with other colleagues in a single resource that veterinarians can easily access. Reaching out to those veterinarians and offering them an opportunity to publish in a quality open access journal will be very appealing. An initial survey with an aquatic veterinary listserv indicated that at least 10 institutions were interested in collaborating, which suggests that the content is there and possibly others have similar research that can be tapped into for this special edition. *Frontiers in Veterinary Science* is offering a special edition for **Advanced Veterinary Topics in Elasmobranchs**. This opportunity will collect multiple topics in shark and ray medicine which will include important baseline data in clinical pathology, evaluation of diagnostics that can be accurately used in patient care, descriptions of diseases that have not been previously published, and sharing techniques with colleagues to elevate the capacity of veterinarians to make diagnoses. Manuscripts of interest include: Retrospective surveys of disease, Baseline data on species previously unpublished, bloodwork, imaging, other Techniques that can advance diagnosis of disease, Test and assay validation.
