Breaking Images Brian Greer, David Kollosche, Ole Skovsmose, 2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book's emphasis on

education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject **Common Core State Standards for Mathematics** ,2012 **Adding Talk To The Equation** Lucy West,2023-10-10 For more than 20 years Lucy West has been studying mathematical classroom discourse She believes that teachers need to understand what their students are thinking as they grapple with rich mathematical tasks and that the best way to do so is through talking and listening In this video rich edition of Adding Talk to the Equation Discussions and Discovery in Mathematics she invites teachers into real life classrooms where all students stay in the game stay motivated about learning and ultimately deepen their understanding Designed for math teachers and coaches in grades 18 this self study guide showcases elementary and middle school classrooms where teachers inspire even the most reluctant students to share their ideas Through the stories of skilled teachers West offers play by play commentary as they get more comfortable with new talk moves and learn to tune in and respond to students math conversations Although these discussions occur in math class the strategies can be used to create a respectful productive environment for any subject area This video based resource examines the importance of creating a safe learning environment the value of thinking reasoning and questioning the role of active accountable listening and the necessity of giving all students a you can do this message West also emphasizes that slowing down even in the face of time constraints is crucial for creating a classroom where all students feel they have something to contribute This guide includes transcripts of the case studies with insightful commentary from West that gives you a window into her thinking and the complexities of the work she is doing with teachers as well as her reflections on missed opportunities California Common Core State Standards California.
