Reading Comprehension Gr. 5-8 Brenda Rollins, 2009-09-01 A child's ability to read and comprehend the written word is his touchstone to success in school and in life. Designed to teach the reading skills that are basic to reading fluency, our resource emphasizes the primary building blocks of reading acquisition. Start off by identifying the main idea of a passage. Find out how details will point to the most important part of a story. Then use graphic organizers to help identify context clues. Find out what questions to ask before drawing conclusions. Gather all the facts and prior knowledge to help. Learn all about making inferences and how clues from the text and your own knowledge and experiences will tell you what the author is trying to say. Discover the differences between facts and opinions. Learning to read between the lines will help with comprehension. Finally, discover transition words as you learn about sequencing. Aligned to your State Standards and written to Bloom's Taxonomy, reproducible writing tasks, crossword, word search, comprehension quiz, and answer key are also included.

Scientific Method Lesson Plans Stella Tartsinis, 2024-09-17 These lesson plans introduce students to the steps of the scientific method in an engaging, hands-on way. By guiding students through each step with simple experiments, they will develop a foundational understanding of how scientific inquiry works. The lesson plan outline introduces elementary students to the scientific method. Each lesson plan focuses on one step of the process, helping students understand how scientists ask questions, experiment, and draw conclusions. These lesson plans can be spread over several class periods.

Personal Epistemology and Teacher Education Jo Brownlee, Gregory Schraw, Donna Berthelsen, 2012-05-23 *Personal Epistemology and Teacher Education* edited by Joanne Brownlee, Gregg Schraw, and Donna Berthelsen provides an international perspective on teachers' personal epistemology or beliefs about the nature of knowledge and knowing. Research from The Netherlands, Cyprus, Australia, United States, Canada, Norway, and Taiwan is presented to provide diverse viewpoints on personal epistemology for early childhood, primary, secondary, and tertiary teaching contexts. The text provides a platform for cutting-edge theory and research about how personal epistemology can be applied to the context of teacher education, thereby making explicit the connection between personal epistemology and teaching and students' learning outcomes. Topics include cultural differences in teacher epistemology and the impact on students' learning; teachers' epistemological beliefs and inclusion; teachers' epistemology and reading lessons; citizenship education and teaching science; epistemology in a social context; teachers' epistemological beliefs and student autonomy; teacher education and analysis of preservice and practicing teachers; implications of teachers' epistemological beliefs; connections to future practice; teacher education and teacher behaviours are foregrounded across the topics with an emphasis on the origin and composition of teachers' epistemological beliefs and how universities motivate change through formal teacher education. Teaching behaviours are discussed in relation to how teachers' beliefs are related to the curricular and pedagogical choices that they make in their classrooms, assessment of learning outcomes, and classroom management practices.
