*Intentional Perspectives on Information Systems Engineering* Selmin Nurcan,Camille Salinesi,Carine Souveyet,Jolita Ralyté,2010-06-17 Requirements engineering has since long acknowledged the importance of the notion that system requirements are stakeholder goals rather than system functions and ought to be elicited modeled and analyzed accordingly In this book Nurcan and her co editors collected twenty contributions from leading researchers in requirements engineering with the intention to comprehensively present an overview of the different perspectives that exist today in 2010 on the concept of intention in the information systems community These original papers honor Colette Rolland for her contributions to this field as she was probably the first to emphasize that intention has to be considered as a first class concept in information systems engineering Written by long term collaborators and most often friends of Colette Rolland this volume covers topics like goal oriented requirements engineering model driven development method engineering and enterprise modeling As such it is a tour d horizon of Colette Rolland s lifework and is presented to her on the occasion of her retirement at CaISE 2010 in Hammamet the conference she once cofounded and which she helped to grow and prosper for more than 20 years      BIAN 2nd Edition – A framework for the financial services industry BIAN eV,2021-07-09 The Banking Industry Architecture Network BIAN is a global not for profit association of banks solution providers consultancy companies integrators and academic partners with the shared aim of defining a semantic standard for the banking industry covering all banking activity and almost all of the well known architectural layers BIAN s Reference Architecture for the Financial Industry provides its users with a set of building blocks that when used in different combinations can support all of the functionality and information a bank needs for both its internal functioning and its collaboration with partners in an Open Finance and Open API economy BIAN s Reference Architecture for the Financial Industry is freely available on the BIAN website This website also provides a wealth of information on both the theory and practice of the standard So why this book Importantly it summarizes all of the above information and guides the reader through it on a step by step basis It provides the reader with a thorough understanding of BIAN s architecture and how it can be used to support an organization on its journey to becoming an agile business organization and developing an application platform BIAN is a semantic standard It provides business building blocks and defines them in business terms It provides a business view on both the business and application architectures This second edition not only includes the more recent deliverables it also takes a stepped approach

through the different topics It aims to be more appealing to a business audience by addressing the building blocks of BIAN and their possible use in business terms whilst also including many real life examples of BIAN s usage As such it should not only appeal to application and business architects but also to their managers their business partners and other stakeholders who work closely with them The first part of the book focuses on the theory BIAN s organization the principles and patterns on which its architecture is based and its building blocks The second part of the book explains in methodology independent terms how BIAN can be applied in different architectural layers by different disciplines in co operation with architects This part of the book includes a number of practical examples intended to improve the reader s understanding of the building blocks of the BIAN architecture and encourage them to apply it for the benefit of their own organization The final part of the book should inspire the reader even further by clearly illustrating the synergy between the content that BIAN delivers and the architecture methodology provided by TOGAF **Handbook of Research on Complex Dynamic Process Management: Techniques for Adaptability in Turbulent Environments** Wang, Minhong,Sun, Zhaohao,2009-07-31 Investigates the nature and history of dynamic processes essential to understanding the need for flexibility and adaptability as well as the requirements to improve solutions **Ernst Denert Award for Software Engineering 2019** Michael Felderer,Wilhelm Hasselbring,Heiko Koziolek,Florian Matthes,Lutz Prechelt,Ralf Reussner,Bernhard Rumpe,Ina Schaefer,2020-12-03 This open access book provides an overview of the dissertations of the five nominees for the Ernst Denert Award for Software Engineering in 2019 The prize kindly sponsored by the Gerlind Ernst Denert Stiftung is awarded for excellent work within the discipline of Software Engineering which includes methods tools and procedures for better and efficient development of high quality software An essential requirement for the nominated work is its applicability and usability in industrial practice The book contains five papers describing the works by Sebastian Baltes U Trier on Software Developers Work Habits and Expertise Timo Greifenberg s thesis on Artefaktbasierte Analyse modellgetriebener Softwareentwicklungsprojekte Marco Konersmann s U Duisburg Essen work on Explicitly Integrated Architecture Marija Selakovic s TU Darmstadt research about Actionable Program Analyses for Improving Software Performance and Johannes Sp th s Paderborn U thesis on Synchronized Pushdown Systems for Pointer and Data Flow Analysis which actually won the award The chapters describe key findings of the respective works show their relevance and applicability to practice and industrial software engineering projects and provide additional information and findings that have only been discovered afterwards e g when applying the results in industry This way the book is not only interesting to other researchers but also to industrial software professionals who would like to learn about the application of state of the art methods in their daily work *Environments for Multi-Agent Systems III* Danny Weyns,2007-02-28 This book constitutes the thoroughly refereed post proceedings of the Third International Workshop on Environments for Multiagent Systems E4MAS 2006 held in Hakodate Japan in May 2006 as an associated event of AAMAS 2006 the 5th International Joint Conference on Autonomous Agents and
