**Advanced Topics in Artificial Intelligence** Norman Foo, 2007-12-07 The 12th Australian Joint Conference on Artificial Intelligence AI QQ held in Sydney Australia 6-10 December 1999 is the latest in a series of annual regional meetings at which advances in artificial intelligence are reported. This series now attracts many international papers and indeed the constitution of the program committee reflects this geographical diversity. Besides the usual tutorials and workshops this year the conference included a companion symposium at which papers on industrial applications were presented. The symposium papers have been published in a separate volume edited by Eric Tsui. Ar99 is organized by the University of New South Wales and sponsored by the Australian Computer Society, the Commonwealth Scientific and Industrial Research Organisation, CSIRO Computer Sciences Corporation, the KRRU group at Griffith University, the Australian Artificial Intelligence Institute and Neuron Works Ltd. Ar99 received over 120 conference paper submissions of which about one third were from outside Australia. From these 39 were accepted for regular presentation and a further 15 for poster display. These proceedings contain the full regular papers and extended summaries of the poster papers. All papers were refereed mostly by two or three reviewers selected by members of the program committee and a list of these reviewers appears later. The technical program comprised two days of workshops and tutorials followed by three days of conference and symposium plenary and paper sessions.

**Advanced Topics in Artificial Intelligence** John K. Slaney, 1998-10-07 This book constitutes the refereed proceedings of the 10th Australian Joint Conference on Artificial Intelligence AI 97 held in Perth Australia in November-December 1997. The volume presents 48 revised full papers selected from a total of 143 submissions. Also included are three keynote talks and one invited paper. The book is divided into topical sections on constraint satisfaction and scheduling, computer vision, distributed AI, evolutionary computing, knowledge based systems, knowledge representation and reasoning, learning and machine vision, machine learning, NLP and user modeling, neural networks, robotics and machine recognition, and temporal qualitative reasoning.
