Elder Mistreatment Tanya F. Johnson, 1991-03-30 Mistreatment of the elderly became recognized as a serious and growing problem in the late 1970s as a result of governmental investigations and research in the public and private sectors Although in most states elder mistreatment is handled by social service agencies other professionals are also needed to broaden the identification team and help alleviate the risk to the older adults This book is designed for human services professionals who are not necessarily adult protective services specialists but who provide direct ongoing services to elder adults Its purpose is to offer guidelines for detecting elder mistreatment so that assistance can be given to the vulnerable older adults to preserve their particular quality of life The book is arranged into seven chapters The first discusses why elder serving human services professionals should become involved in mistreatment identification while chapter two focuses on the various starting points in the definition of elder mistreatment Chapters three and four review research on risk factors in elder mistreatment and detail varieties of mistreatment measures and methods for distinguishing between them A review of risk instruments used in adult protective services and non adult protective services settings forms the basis of chapter five and chapter six outlines a proposed risk assessment model specially designed for elder serving human service professionals The final chapter offers some prospects for the future of elder mistreatment risk assessments The work concludes with a set of four appendices
