Mitigation Bert Metz,2001-07-12 Climate Change 2001 Mitigation is the most comprehensive and up to date scientific
technical and economic assessment of options to mitigate climate change and their costs The report Makes clear there are
strong inter linkages between climate change policy and policies towards sustainable development Assesses information on
technological options to reduce greenhouse gas emissions or enhance their sinks Analyses technologies and practices
available to achieve the targets of the Kyoto Protocol and stabilise atmospheric concentrations of greenhouse gases
Evaluates barriers impeding implementation of these options and methods available to overcome them Summarises the
economic literature on costs of climate change mitigation at global regional and national levels Evaluates the other benefits
that climate policy can deliver or the climate benefits of other socio economic policies Assesses how this information can be
used to support climate policy decision making acknowledging various decision making frameworks This latest IPCC
assessment will again form the standard scientific reference for all concerned with climate change and who want to be
informed of ways to address this important global problem including students and researchers in environmental and social
sciences and policymakers and analysts in governmental and non governmental organisations and the private sector world
