Educating Middle Class Daughters Carol Gold, 1996 When Denmark introduced compulsory education in 1814 the city of Copenhagen responded by regulating the already existing private school system Roughly half of the school age population went to some kind of school and of those the overwhelming majority attended private schools most of which were run by women The book tells the story of these women their schools and pupils on the 150 private schools from 1790 1820 Carol Gold's contention is that these private schools and their teachers were much better than is presently assumed in Danish historiography The teachers were all literate they could read and most of them could write The education provided for girls ranged from the basics of reading writing and arithmetic plus needlework in the beginner schools to the scientific subjects of history geography natural sciences and foreign languages in the more advanced academies Furthermore the schools formed the basis of the Copenhagen school system which was established at the beginning of the 19th century

The Last Plague in the Baltic Region 1709-1713 Karl-Erik Frandsen, 2010 The Last Plague in the Baltic Region 1709 1713 offers a thorough description and analysis of the terrible plague epidemic that ravaged the Baltic region in the years between 1709 and 1713 at the same time when the region was razed by the Great Northern War 1700 21 Sweden under Carolus XII had lost its supremacy and Russia under Peter the Great emerged as the new major power in the region With the marching armies came the plague and its effects which were particularly devastating since it hit a population already weakened by famines and desolation caused by the war Drawing on substantial documentation in city and state archives the study addresses a range of important discussions touching on the far reaching consequences of the plague across the region including mortality rates symptoms of the disease treatments how the disease spread why some parishes villages houses and families were particularly hard hit the measures taken by the authorities to confine the epidemic and the reactions of people

to these measures Offering detailed information of the plague s demographic and economic consequences as well as tragic accounts of its victims this volume constitutes a fascinating synthesis and assessment of a devastating chapter in the region s history **Volume 8, Tome I: Kierkegaard's International Reception - Northern and Western Europe** Jon

Stewart,2016-12-05 Although Kierkegaard s reception was initially more or less limited to Scandinavia it has for a long time now been a highly international affair As his writings were translated into different languages his reputation spread and he became read more and more by people increasingly distant from his native Denmark While in Scandinavia the attack on the Church in the last years of his life became something of a cause c l bre later many different aspects of his work became the object of serious scholarly investigation well beyond the original northern borders As his reputation grew he was co opted by a number of different philosophical and religious movements in different contexts throughout the world The three tomes of this volume attempt to record the history of this reception according to national and linguistic categories Tome I covers the reception of Kierkegaard in Northern and Western Europe The articles on Denmark Norway Sweden Finland and Iceland can be said to trace Kierkegaard s influence in its more or less native Nordic Protestant context Since the authors in these countries with the exception of Finland were not dependent on translations or other intermediaries this represents the earliest tradition of Kierkegaard reception The early German translations of his works opened the door for the next phase of the reception which expanded beyond the borders of the Nordic countries The articles in the section on Western Europe trace his influence in Great Britain the Netherlands and Flanders Germany and Austria and France All of these countries and linguistic groups have their own extensive tradition of Kierkegaard reception Videnskabelige meddelelser fra den Naturhistorisk Forening i København Dansk Naturhistorisk Forening i København,1928 **The Spirit of Vitalism** Gertrud Hvidberg-Hansen, Gertrud Oelsner,2011 This richly illustrated book outlines the strong Vitalistic movement in Denmark during the period 1890 1940 This movement emerged as a response to the rationalism and one sided intellectualism of a rigid bourgeois or decadent culture of the 19th century It constituted a number of cultural currents that were manifested in philosophy art and everyday life with an emphasis on the energy of youth the dynamic personality and the potential of the body Viewed in the wider perspective the aim of Vitalism s cult of the body was a revitalization that was to benefit not only the individual human being but the whole of culture Although the Vitalistic themes emanated from modern life they also drew artistic sustenance from Nordic mythology and Greek antiquity which served as the most important ideals in the modern pursuit of both physical and spiritual beauty Additionally the book highlights the prevalence of the interest in health and exercise and an increased attentiveness to hyg **Intercultural Relations and Religious Authorities** W. A. R. Shadid,P. Sj. van Koningsveld,2002 The permanent presence of Islam and Muslims in the countries of the European Union implies many different forms of intercultural relations at different levels of society as for instance between Muslims and other religious or philosophical groups within the framework of social and health care in city life and within the sector of education

Furthermore the relations between Muslim religious authorities and society at large may be seen as forms of intercultural relations. All these types of intercultural relations are influenced by the images fostered by various groups and individuals about the Others. The chapters comprising of this volume each contribute to the elucidation of some aspects of these processes of intercultural relations. They have been grouped into four main categories: the image formation about Islam and Muslims and its impact on their position in the countries of the European Union especially in the press, in schoolbooks and in local politics; the intercultural relations between Muslims and other groups and institutions in the countries concerned as stereotypes and prejudices can exercise a detrimental effect upon intercultural relations within many different sectors of society; religion and education and especially the Islamic Religious Education as well as the religiousness of Muslim and non-Muslim pupils; the religious authorities of the Muslim communities in the countries of the European Union and their contribution to the formation of a European Islam. In this context special attention is paid to the role Muslim religious authorities play in the discussions concerning political participation by Muslims in the West. **Baylor University**

Anderson, 1975-01-01. This book is about individuals in their daily lives. So writes Robert Anderson, a distinguished anthropologist whose study of Denmark offers the reader a unique opportunity to analyze a culture before development during development and as a modern nation. His purpose is to give the reader a feeling of what it means to live in a developing nation and the quality of life afforded by each historical period. Danish social scientists and historians nurture a long tradition of research matched by those of only a few nations in the thoroughness and skill with which they have retrieved knowledge of their own past. Thus while the readable content of the book is geared to the student or layman, the original analysis and data behind it will be of special interest to the professional scholar. The book is divided into topics as well as chronological periods. From Chapter One, Denmark as a Developing Nation, to Chapter Sixteen, Danes Today, we see both Noble Life and Village Life, their uniformities and variabilities. Also treated in depth are The Working Class in 1900, The Burghers of Old, The Middle Class, and the subtle transition From Peasant to Farmer. Finally, the author explores Urbanization and The Culture of the Masses. Dr. Anderson concludes that Modern Denmark constitutes the culmination or near culmination of changes begun in the period of development. And yet as he goes on to explain, Even today Denmark remains a developing nation. In two ways then, Denmark is a useful paradigm for study. Its past can be constructively compared to the present of other currently developing countries in the southern hemisphere and the Third World. On the other hand, modern Denmark is typical of other Western nations which have yet to reap from industrialized society equal opportunity for all members. In still

another way the value of Dr Anderson's analysis is twofold. The responsive reader cannot fail to find in Denmark Success of a Developing Nation a microcosm of the kinds of change which have happened and continue to happen the world over. In addition, however, and perhaps most importantly, the reader finds the fascinating and very unique world of an important European community.

Woven into the Earth Else Ostergaard, 2003-05-01. One of the century's most spectacular archaeological finds occurred in 1921, a year before Howard Carter stumbled upon Tutankhamun's tomb, when Poul Norlund recovered dozens of garments from a graveyard in the Norse settlement of Herjolfsnaes, Greenland. Preserved intact for centuries by the permafrost, these mediaeval garments display remarkable similarities to western European costumes of the time. Previously, such costumes were known only from contemporary illustrations, and the Greenland finds provided the world with a close look at how ordinary Europeans dressed in the Middle Ages. Fortunately for Norlund's team, wood has always been extremely scarce in Greenland, and instead of caskets, many of the bodies were found swaddled in multiple layers of cast-off clothing. When he wrote about the excavation, later Norlund also described how occasional thaws had permitted crowberry and dwarf willow to establish themselves in the top layers of soil. Their roots grew through coffins, clothing, and corpses alike, binding them together in a vast network of thin fibers, as if he wrote the finds had been literally sewn in the earth. Eighty years of technical advances and subsequent excavations have greatly added to our understanding of the Herjolfsnaes discoveries.

Woven into the Earth recounts the dramatic story of Norlund's excavation in the context of other Norse textile finds in Greenland. It then describes what the finds tell us about the materials and methods used in making the clothes. The weaving and sewing techniques detailed here are surprisingly sophisticated, and one can only admire the talent of the women who employed them, especially considering the harsh conditions they worked under. While *Woven into the Earth* will be invaluable to students of medieval archaeology, Norse society, and textile history, both lay readers and scholars are sure to find the book's dig narratives and glimpses of life among the last Vikings fascinating.
