

Features & Controls

NOTICE:

Although the HUD image appears to be near the front of the vehicle, do not use it as a parking aid. The HUD was not designed for that purpose. If you try to use it that way, such as in a parking lot, you may misjudge distance and run into something.

■ Head-Up Display

(OPTION) (CONT.)

When you sit straight in your seat, the HUD image will appear directly in front of the driver.

When the ignition key is turned to "Run", all possible HUD images will come on and look like this. Then the Head-Up Display will operate normally.

If you never look at your instrument panel, you may not see something important, such as a warning light. So be sure to scan your displays and controls and the driving environment just as you would in a vehicle without HUD.

Adjusting the HUD

The HUD controls are located to the left of the steering column.

1. Start your engine and slide the HUD dimmer control (to the left of the steering wheel) all the way up.

The brightness of the HUD image is determined by whether the headlight switch is on or off, and where you have set the HUD dimmer control.

2. Adjust the seat, if necessary, before setting the height control.
