

TITLE OF YOUR PAPER

Continue putting your title, or the abbreviated version, in the upper left-hand corner of each page.

2

Full Title of Paper, Centered and Double-Spaced in

12-point, Times New Roman Font

Tab to indent all paragraphs ¼".

Begin your paper with an introduction. The active voice, rather than the passive voice, should be used in your writing.

This template is formatted according to APA Style guidelines, with one-inch margins on all sides, Times New Roman, 12-point font, double-spacing, left-aligned text, and each new paragraph indented one half inch.

Double-space the entire document.

## Headings

You may wish to use headings and subheadings to organize the sections of the paper. The first heading level is capitalized and centered just like the paper's title. Do not begin a new page for each heading.

### *Subheading*

Subheadings are used to differentiate sections within headings, are italicized and are aligned flush left.

### *Citations*

Any sources used must be documented both in the body of the paper using in-text citations, as well as at the end in the Reference list. In-text citations generally include the author's name and publication date of each source in parentheses, like this: (Author's Last Name, Publication Year), or (Smith, 2001). Complete instructions for formatting in-text citations can be found at <https://owl.english.purdue.edu/owl/resource/560/02/>

## Citations In A Paper:

**Citation Analysis and Dynamics of Citation Networks** Michael Golosovsky, 2019-09-26 This book deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics
