table Cooking in America, 1590-1840 Trudy Eden, 2006-08-30 There are no recipes for what the Indians ate in Colonial
times but this cookbook uses period quotations to detail what and how the foodstuffs were prepared The bulk of the cookbook
is devoted to what the European immigrants cooked and what evolved into American cooking The first colonists from
England brought their foodways to America The basic foods that Americans of European descent ate changed very little from
1600 to 1840 While the major basic foods remained the same their part in the total diet changed Americans at the end of the
period ate far more beef and chicken than did the first colonists They used more milk butter and cream They also ate more
wheat in the form of breads cakes cookies crackers and cereals The same was true with fruits Over time the more exotic
vegetables like broccoli cauliflower artichokes and numerous root vegetables including both sweet and white potatoes
became common vegetables By the end of this period many Americans were even eating foods like tomatoes okra and sesame
which were unknown to their ancestors In addition Americans like their relatives in Europe incorporated coffee tea and
chocolate into their diets as well as more sugar Along with them came new customs such as tea time and for men socializing
at coffeehouses Also distilled beverages particularly rum which was often made into a punch with citrus juices were
increasingly used Basic cooking technology also remained the same throughout the period and the cookbook gives a sense of
how meals were prepared The open hearth provided the major heat source As time passed though more and more people
could afford to have wood fired brick ovens in their homes Although the recipes presented here from the first century of
colonization come from cookbooks written for people of upper status by the end of the time period literacy rates were much
higher among men and women European and American authors published numerous cookbooks that were relatively
inexpensive and available so it is reasonable to assume that those recipes were representative of actual American cookery
practices Many changes occurred to cookbooks and recipes during this period The recipes became more detailed and more
reliant on standard measures and the recipes were for foods that are less complicated and expensive to prepare This fact is
more a sign that cookbooks were being written for a less wealthy group of readers than that tastes and appetites had
changed The trend toward simple and frugal foods continued up to 1840 and beyond a sign that readership had expanded as
well as an indicator of what the bulk of Americans were eating As well recipes that were considered American were
developed All of these recipes are in their original form and have been taken from contemporary published or private
cookbooks The explanations after the recipes give historical information and suggestions if the recipe is vague or if it calls for
an unusual ingredient Dining tips are included as well Period illustrations complement the recipes **Dishing Up®**
