AutoCAD is one of the most popular CAD programs available today and with these training videos you will become comfortable and capable with 2D AutoCAD drafting. The lessons in this AutoCAD tutorial are designed for the beginner and do not assume you have any prior experience in AutoCAD. You are introduced to the software step by step and each tutorial builds on the previous. You will work with the author throughout the course with the files he has provided reinforcing each lesson by practicing it right in the AutoCAD 2014 software. Some of the features and tools you will learn include object selection, drawing and drafting tools, editing tools, measuring and precision tools, how to use layers, annotations, blocks, the difference between paper and model space, as well as plotting and publishing your drawings. Once you have completed this AutoCAD 2014 software training course, you will be capable of drafting and publishing basic 2D AutoCAD drawings. You will be familiar with the tools that AutoCAD has to offer and how you can use them for your own projects. You will also be fully prepared to continue on to the Infinite Skills Advanced AutoCAD 2014 training course.

Spatial Cognition XII Jurgis Škilters, Nora S. Newcombe, David Uttal, 2020-08-25. This book constitutes the thoroughly refereed proceedings of the 12th International Conference Spatial Cognition 2020 held in Riga, Latvia, in September 2020. The physical event was postponed to 2021 due to the COVID-19 pandemic. The 19 full papers and 6 short papers presented in this book were carefully selected and reviewed from 50 submissions. They focus on the following topics: spatial representation and cognitive maps, navigation and wayfinding, spatial representation in language, logic and narrative, and spatial abilities and learning.

Teaching Innovation in Architecture and Building Engineering David Bienvenido-Huertas, María Luisa de la Hoz-Torres, Antonio Jesús Aguilar Aguilera, 2024-06-19. This book presents contributions on teaching innovation in university architecture and building engineering studies. The authors explain how the construction sector demands that future architects and building engineers have the knowledge and skills that allow them to meet the decarbonization objectives established by international organizations and that this causes the level of knowledge to be higher. The contributors further discuss new technologies and the internationalization of studies, presenting new challenges university studies must face. This heterogeneity is represented in the chapters that make up this book, developed by researchers from different countries. The book is divided into three blocks: i) Active learning methodologies; ii) Innovative methodologies applied to learning process; and iii) Traditional vs. Advanced Techniques. The chapters of the book represent an advance in the current knowledge of teaching innovation techniques in university architecture and building engineering studies.

BIM Teaching and Learning Handbook M. Reza Hosseini, Farzad Khosrowshahi, Ajibade Aibinu, Sepehr Abrishami, 2021-08-09. This book is the essential guide to the pedagogical and industry-inspired considerations that must shape how BIM is taught and learned. It will help academics and professional educators to develop programmes that meet the competences required by professional bodies and prepare both graduates and existing practitioners to advance the industry towards higher efficiency and quality. To date, systematic efforts to integrate pedagogical considerations into the way BIM is learned and taught remain non-existent. This book lays the

foundation for forming a benchmark around which such an effort is made. It offers principles, best practices and expected outcomes necessary to BIM curriculum and teaching development for construction related programs across universities and professional training programmes. The aim of the book is to Highlight BIM skill requirements, threshold concepts and dimensions for practice. Showcase and introduce tried and tested practices and lessons learned in developing BIM related curricula from leading educators. Recognise and introduce the baseline requirements for BIM education from a pedagogical perspective. Explore the challenges as well as remedial solutions pertaining to BIM education at tertiary education. Form a comprehensive point of reference covering the essential concepts of BIM for students. Promote and integrate pedagogical consideration into BIM education. This book is essential reading for anyone involved in BIM education, digital construction, architecture and engineering and for professionals looking for guidance on what the industry expects when it comes to BIM competency.

HCI in Games Xiaowen Fang, 2024-05-31.
