workbook for students a how to guide to learning human anatomy and physiology through touch dissection observation experimentation and critical thinking exercises Students are guided to formulate a hypothesis about each experiment before beginning physiology exercises Diagrams direct students in how to perform experiments and don t just show the end results The text is written in a friendly conversational tone to put students at ease as they discover organize and understand the material presented in each chapter

Human Anatomy Laboratory Atlas Christine M Eckel,2007-05 Human Anatomy Laboratory Manual by Christine Eckel is a hands on learning tool designed to guide students through human anatomy concepts through observation touch dissection and practical activities such as sketching labeling and coloring Exquisite dissection photographs capture anatomical details and a student friendly writing style uses relevant examples to engage students in concept application It focuses on human specimens and also includes common animal specimens such as cow eye sheep brain and sheep heart This manual was expressly written to supplement and expand upon content covered in the lecture course not to repeat it It accompanies McKinley O Loughlin Human Anatomy 2nd edition but is also a stand alone product that works well with any 1 semester human anatomy text
