**Bonobo Cognition and Behaviour**

Brian Hare,Shinya Yamamoto,2015-11-30 This volume includes twelve novel empirical papers focusing on the behaviour and cognition of both captive and wild bonobos *Pan paniscus* Overall it demonstrates how anyone interested in understanding humans or chimpanzees must also know bonobos      *The Gestural Communication of Apes and Monkeys* Josep Call,Michael Tomasello,2020-08-18 The Gestural Communication of Apes and Monkeys is an intriguing compilation of naturalistic and experimental research conducted over the course of 20 years on gestural communication in primates as well as a comparison to what is known about the vocal communication of nonhuman primates The editors also make systematic comparisons to the gestural communication of prelinguistic and just linguistic human children An enlightening exploration unfolds into what may represent the starting point for the evolution of human communication and language This especially significant read is organized into nine chapters that discuss the gestural repertoire of chimpanzees gestures in orangutans subadult gorillas and siamangs gestural communication in Barbary macaques and a comparison of the gestures of apes and monkeys This book will appeal to psychologists anthropologists and linguists interested in the evolutionary origins of language and or gestures as well as to all primatologists A CD insert offers video of gestures for each of the species      Different Frans de Waal,2022-04-05 Longlisted for the PEN E O Wilson Literary Science Writing Award Every new book by Frans de Waal is a cause for excitement and this one is no different A breath of fresh air in the cramped debate about the differences between men and women Fascinating nuanced and very timely Rutger Bregman author of *Humankind A Hopeful History* In *Different*

world renowned primatologist Frans de Waal draws on decades of observation and studies of both human and animal behavior to argue that despite the linkage between gender and biological sex biology does not automatically support the traditional gender roles in human societies While humans and other primates do share some behavioral differences biology offers no justification for existing gender inequalities Using chimpanzees and bonobos to illustrate this point two ape relatives that are genetically equally close to humans de Waal challenges widely held beliefs about masculinity and femininity and common assumptions about authority leadership cooperation competition filial bonds and sexual behavior Chimpanzees are male dominated and violent while bonobos are female dominated and peaceful In both species political power needs to be distinguished from physical dominance Power is not limited to the males and both sexes show true leadership capacities Different is a fresh and thought provoking approach to the long running debate about the balance between nature and nurture and where sex and gender roles fit in De Waal peppers his discussion with details from his own life a Dutch childhood in a family of six boys his marriage to a French woman with a different orientation toward gender and decades of academic turf wars over outdated scientific theories that have proven hard to dislodge from public discourse He discusses sexual orientation gender identity and the limitations of the gender binary exceptions to which are also found in other primates With humor clarity and compassion Different seeks to broaden the conversation about human gender dynamics by promoting an inclusive model that embraces differences rather than negating them *Apes of the Impenetrable Forest* Craig Britton Stanford,2008 *Apes of the Impenetrable Forest The Behavioral Ecology of Sympatric Chimpanzees and Gorillas* offers students a scholarly and relevant study This is an account of a nine year project on the behaviour and ecology of chimpanzees and mountain gorillas living in the same African forest Students are able to see the way in which a project is planned and put into action as well as the results The Magazine of Fantasy & Science Fiction ,1999 **Biological Anthropology** Michael Alan Park,2005 **Folia Primatologica** ,2008 *The New York Times Magazine* ,1997 Mysterious Creatures: N-Z George M. Eberhart,2002 Offers an A Z guide to animals that have yet to be officially recognized in science discussing where these animals live and why they remain a mystery **The Utne Reader** ,1997 **Psychic Pets** Emma Heathcote-James,2007 In this exploration of animals who have performed exceptional acts of intuition compassion protection healing courage or have been part of a miraculous or mystical experience the author investigates and celebrates inspirational tales from the animal kingdom The author asks and tries to answer how these things are possible whether animals possess an innate psychic ability which gives them their powers of perception or even permits them to see into the future It s time to take a look at what humans might be missing Instead of viewing animals as dumb beasts this book invites us to give them the respect they are due **Feminism and Love** Ruth Whitney,1998 Presents a new vision of feminism and love **Humankind Evolving** A. Roberto Frisncho,2006 **Evolution of Communicative Flexibility** D. Kimbrough Oller,Ulrike Griebel,2008 Experts investigate communicative flexibility in both form and usage of

signals as the foundation of the evolution of complex communication systems including human language The evolutionary roots of human communication are difficult to trace but recent comparative research suggests that the first key step in that evolutionary history may have been the establishment of basic communicative flexibility the ability to vocalize freely combined with the capability to coordinate vocalization with communicative intent The contributors to this volume investigate how some species particularly ancient hominids broke free of the constraints of fixed signals actions that were evolved to communicate but lack the flexibility of language a newborn infant's cry for example always signals distress and has a stereotypical form not modifiable by the crying baby Fundamentally the contributors ask what communicative flexibility is and what evolutionary conditions can produce it The accounts offered in these chapters are notable for taking the question of language origins farther back in evolutionary time than in much previous work Many contributors address the very earliest communicative break of the hominid line from the primate background others examine the evolutionary origins of flexibility in for example birds and marine mammals The volume's interdisciplinary theoretical perspectives illuminate issues that are on the cutting edge of recent research on this topic Contributors Stephanie Barbu Curt Burgess Josep Call Laurance Doyle Julia Fischer Michael Goldstein Ulrike Griebel Kurt Hammerschmidt Sean Hanser Martine Hausberger Laurence Henry Allison Kaufman Stan Kuczaj Robert F Lachlan Brian MacWhinney Radhika Makecha Brenda McCowan D Kimbrough Oller Michael Owren Ron Schusterman Charles T Snowdon Kim Sterelny Benoit Test Gert Westermann
