Volume 1 of the Collected Works of Marie-Louise von Franz Marie-Louise von Franz, 2021-09-20 This newly translated volume of the Collected Works of Marie Louise von Franz, one of the most renowned authorities on fairytales, presents a systematic and wide-ranging approach. Von Franz amplifies a variety of fairytale motifs to show that the magical realm is alien to the profane and mundane realm of ordinary daily life. She was one of Analytical Psychology's most original thinkers and here she presents a lucid, concise exploration of the archetypal symbols found in fairytales. Fairytales like myths provide a cultural and societal backdrop that helps the human imagination narrate the meaning of life's events. The remarkable similarities in fairytale motifs across different lands and cultures inspired many scholars to search for the original homeland of fairytales. While peregrinations of fairytale motifs occur, the common root of fairytales is more archetypal than geographic. A striking feature of fairytales is that a sense of space, time, and causality is absent. This situates them in a magical realm, a land of the soul where the most interesting things happen in the center of places like Heaven, mountains, lakes, and wells. At the age of eighteen, Marie Louise von Franz was invited to meet Carl Gustav Jung at Bollingen Tower. She immediately recognized that there exist two levels of reality: one outer and the other inner. Within months, she had enrolled at the University of Zurich and began attending Jung's lectures at the Eidgenössische Technische Hochschule or the Swiss Federal Institute of Technology. Less than a decade after meeting Jung, von Franz had completed her doctorate in classical philology and begun seeing her first analysands. She was a prolific writer, a dedicated teacher and lecturer, and was possessed of a far-reaching and often non-discriminating Eros that accepted everyone seeking help.

**The T'ang Code, Volume II**, 2014-07-14 This is the second and final volume of the annotated translation of a seminal Chinese legal text. The T'ang Code, written in 653 A.D., is the most important legal text in East Asian history. Not only is it China's earliest law code to survive in its entirety, influencing all subsequent Chinese law, but it has also served as a model for codes of law in other East Asian countries, including Japan, Korea, and Vietnam. This is the only translation of the T'ang code into a Western language. The first volume of the Code, published in translation in 1979, specifies the basic principles of T'ang law and explains the structural standards for applying these principles. Volume II describes acts that are punishable by law and enumerates their punishments. For contemporary readers, the T'ang Code is more than simply a legal document. Studying the 445 specific articles sheds considerable light on Chinese culture. The portrait that emerges has surprising resonances in present-day Chinese society, its emphasis on the preservation of the family and the interrelatedness of authority and responsibility, for example. As Western relations with the countries of East Asia continue to expand today, it is increasingly important that we understand the complexities of a legal system that has

evolved over more than fifteen centuries The availability of the complete T ang Code in English is a significant contribution to this understanding Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

*The Holy Spirit and Ch'i (Qi)* Koo Dong Yun, 2012-03-02 This book articulates a contextual pneumatology from a perspective of the Eastern idea of ch i ki in Korean Rather than understanding the Spirit from a Westernized philosophical perspective this book utilizes East Asian categories rooted in the I Ching and Asian religions in dialogue with such prominent Western theologians as Barth Pannenberg Moltmann and Harvey Cox The result is an exciting interaction between the Bible traditions of the West and experiences of the Spirit rooted in East Asia Yun argues that the formal dimension of the Spirit sangjeok is present and active in all cultures and religions while the material dimension of the Spirit muljeok is categorically revealed and embodied through the life of Jesus Christ the event of Pentecost and Charisms given to the church In making his case he mediates a creative balance between countercultural and exclusivist models on the one hand and pluralistic and anthropocentric models on the other
