F. J. Smith, 2016-12-02. A 12-week strength conditioning training program for Basketball focusing on power development for an intermediate level. DS Performance have created an exclusive series of sport-specific strength conditioning training programmes that have underpinning evidence-based training methods which have been put in place to improve your performance for all ages and abilities. All programmes have been designed to develop each specific performance variable through the progression of intensity and volume. Along with your training program, this book contains a supporting guide to mobility training. This guide uses myofascial release, static stretching, and activation work to mobilise the major body parts used in training. It has been put in place to increase your mobility; it can also be used to support your warm-ups and cool-downs. To aid your training, we also included a series of tables to create your lifting percentages. These tables will help you work out your working percentages from 40% to 95%. The tables are broken down into 5% loads, all in kilograms, ranging from 10kg to 300kg. All programmes by DS Performance are 12 weeks in duration; we recommend that you do two six-week training blocks with a deloading week between the two training blocks. This will allow the body to recover, prepare you for the second training phase, and reduce any risk of injury. While in Basketball, no two players are exactly alike in size, shape, or skill level; players must always improve their on-court performance by developing key physical attributes. Because becoming a great basketball player is so much more than just refining the skills that are on display on the court, they need to develop speed, power, agility, and strength for improved performance. This is why our programmes have been designed to develop the key physical attributes for Basketball. Covering the essential physical aspects to Basketball is just as important as putting the time in on the court. Choose your current training level: Amateur, Intermediate, and Advanced, for the variable you would like to train and progress your way up to Advanced to really improve your performance. The three levels: Amateur, Intermediate, and Advanced, represent more your current training age, experience, and skill level. Because weight training and other training methods have a completely different set of skills required when lifting and training correctly compared to your sport, DS Performance training programmes are written to run alongside a skill sport-specific based training plan. DS Performance programmes provide sessions for 3 days of training a week to alternate between your skill sport-specific training sessions.
