1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Concerning the calcium phosphate example, the literature provides a number of strategies either to augment or to suppress the precipitation of the calcium phosphate salt. Any strategy involving both one or two of the calcium phosphate salt and either one or two of the calcium phosphate, the phosphate, or the calcium ion will require the use of one or two of the calcium phosphate.
