THROMBIN TOPICAL
(RECOMBINANT)

20,000 Unit* Reconstitution Instructions

* Units used herein represent international units of potency determined using a reference standard that has been calibrated against the World Health Organization Second International Standard for Thrombin.

Remove the contents of the Recothrom Thrombin Topical (Recombinant) Reconstitution Kit.

Remove the flip-off cap from the top of the Recothrom Thrombin Topical (Recombinant) vial and the diluent vial. Attach a needle-free transfer device (see step 1) to the Recothrom Thrombin Topical (Recombinant) and diluent vials and snap them into place by placing the vial on a flat surface and attaching the transfer device straight into the center of the vial stopper.

Open the sterile, empty 20 mL syringe package and attach the 20 mL syringe to the needle-free transfer device on the diluent vial. Injection of air into the diluent vial may facilitate withdrawal of the diluent.

Draw up 20 mL of diluent from the vial into the syringe.

Remove the diluent-filled syringe from the diluent vial and attach it to the transfer device on the Recothrom Thrombin Topical (Recombinant) vial.

Transfer the 20 mL of diluent from the syringe into the Recothrom Thrombin Topical (Recombinant) vial; the vacuum in the vial facilitates transfer.

Leave the syringe attached and gently swirl until the Recothrom Thrombin Topical (Recombinant) vial until the powder is completely dissolved. Avoid excessive agitation.

Remove pre-printed "DO NOT INJECT" label from the outside of the syringe package and apply it to the syringe.

Withdraw Recothrom Thrombin Topical (Recombinant) solution.

RECOthrom Thrombin Topical (Recombinant) is now ready to be transferred to a labeled receptacle in a sterile field.

RECOthrom IS FOR TOPICAL USE ONLY - DO NOT INJECT.

All RECOthrom Thrombin Topical (Recombinant) Kit components contain latex. Use aseptic technique when handling the vials and syringes.
