READ & THINK A Plant Presentation

After completing Project 2, students present their plant poster to the rest of the class. They can write or talk about their plant like this: *The plant is called ... The fruit is called ... / The vegetable is from the root / stem / leaf / flower. It comes from [Country]. The flower is ... The leaf is ...* Students can then display all the posters together, organizing them into fruit and vegetables, or by different types of plant.

READ & THINK An Amazing Plants Quiz

Choose one of the plants from the Reader, and without saying its name, read out one fact about it and ask students to guess which plant it is. Read out more facts, one at a time, until students guess the correct plant. You can use a point scoring system, for example, five points after one fact, three points after two facts, etc. Students can then do this in small groups or pairs.

READ & THINK What Is in the Photo?

Using the photo on page 18 of the Reader, students list the objects – those made of plant materials and then the others. Then in pairs they can play a game where one student chooses an object in the photo and the other student has to guess what it is. The first student can describe it, or the second student can ask questions. They can also do the same activities with objects in the classroom.

Plant Parts

Using a bigger version of the chart on page 29 of the Reader, students list as many examples as possible. They can do research or limit it to plants that they know.
