Elementary Classroom Management: Lessons from Research and Practice Carol Simon Weinstein, Jr. Mignano, Andrew, 2007 Stressing the need to build caring, supportive relationships with and among students, this trusted text offers research-based guidance on effective classroom management. It addresses current concerns about student motivation and helps prospective and beginning teachers develop a philosophy of classroom management that focuses on building connections with students and creating safe, caring classrooms. The text profiles five master teachers, grades K-1, 3, 4, and 5, in very different school settings as they create classrooms that are orderly and productive, humane and caring. The integration of the thinking and the actual management practices of five real elementary teachers into discussions of research-based management principles prompts readers to connect theories with actual results. Further, the text demonstrates how real teachers can adapt to any circumstances, physical room constraints, curriculum requirements, challenging behaviors, and still be successful.

Middle and Secondary Classroom Management: Lessons from Research and Practice Carol Simon Weinstein, 2007 By integrating the thinking and the actual management practices of four real secondary teachers into discussions of research-based management principles, this introductory text helps readers connect theories with actual results. Further, the text demonstrates how real teachers can adapt to any circumstance, physical room constraints, curriculum requirements, challenging behaviors, and still be successful.

A Teacher's Guide to Classroom Research David Hopkins, 2008-09 This practical guide is for teachers who wish to undertake research in their classrooms with a view to improving their practice. It will enable teachers to enhance their own or their colleagues' teaching and to test educational theory.

Language Teacher Noticing in Tasks Daniel O. Jackson, 2021-04-30 This book provides an accessible, evidence-based account of how teacher noticing—the process of attending to, interpreting, and acting on events which occur during engagement with learners—can be examined in contexts of language teacher education and highlights the importance of reflective practice for professional development. Central to the work is an innovative mixed-methods study of task-based interaction which was undertaken with pre-service English language teachers in Japan. Through close analyses of task interaction coupled with recall data, it illustrates the ways in which pre-service teachers noticed their student partners' use of embodied and linguistic resources. This focus on what teachers attend to, how they interpret it, and their subsequent decisions has multiple implications for language learning and teacher development. It demonstrates the value of teacher noticing for
