Essays on Neuroscience and Political Theory F. Vander Valk,2013-03-01 The past 20 years have seen increasingly bold claims emanating from the field of neuroscience Advances in medical imaging brain modelling and interdisciplinary cognitive science have forced us to reconsider the nature of social cultural and political activities This collection of essays is the first to explore the relationship between neuroscience and political theory with a view to examining what connections can be made and which claims represent a bridge too far The book is divided into three parts Part I places neuroscience as a social and political practice

into historical context Part II weaves together the insights from contemporary neuroscience with the wisdom of major figures in the history of political thought Part III considers how neuroscience can inform contemporary debates about a range of issues in political theory This work brings together scholars who are sceptical about the possibility of integrating neuroscience and political theory with proponents of a neuroscience informed approach to thinking about political and social life The result is a timely and wide ranging collection of essays about the role that our brain might play in the life of the body politic It should be essential reading for all those with an interest in the cutting edge of political theory     Society and Change Harry H. Hiller,1982     On the History of Economic Thought A. W. Bob Coats,2005-08-08 Following an introduction to the key ideas of Coats this work focuses on two themes the difference between British and American economics both in content and in the practice of the profession and the interrelationships between economic ideas events or conditions and policy issues     The Missionary Herald of the Baptist Missionary Society ,1893     *State and Regional Patterns in American Manufacturing, 1860-1900* Albert Niemi,1974-07-18 In this work Professor Niemi offers statistical evidence as to the dispersal of industry after the Civil War and its later concentration as well as the changes in the structural composition of American manufacturing output     Metacognition, Metahumanities, and Medical Education Alan Bleakley,Quentin Eichbaum,Rachel Ellaway,2024-09-30 This persuasive volume develops a novel approach to medical education and the medical humanities making a case for the integration of the two to explore the ways in which warm humanism and cold technologies can come together to design humane posthumanist futures in medicine There are many problems with conventional medical education It can be overly technocratic dehumanizing and empathy eroding introducing artefacts that lead to harm and reproduce inequality and injustice Use of the arts humanities and qualitative social sciences have been pursued as an antidote or balance to these problems Arguing against the purely instrumentalist use of medical humanities in this way this book addresses the importance of a genuine and open ended engagement with humanities approaches in medicine It discusses the impact of artificial intelligence and emerging theoretical frameworks and posthumanist perspectives such as object oriented ontology on meaning making in medicine It demonstrates how the key to such a transition is the recovery of the intrinsic art and humanity of metaphor heavy biomedical science in turn framed by models of dynamic complexity rather than static linearity This book is an important contribution to debates around the medical humanities and its role in medical education It is an essential read for scholars with an interest in these areas as well as those working in science and technology studies and the sociology of health and illness     **The People's Case** Patrick O'Brien,1995     *Interview Speak* Barbara Limmer,Laura Browne,2025-08-05 Discover how to decipher the most important job interview questions so you can tell your interviewer what they really want to know Interview Speak shows you how to ace job interviews by answering the questions behind the questions Written for job seekers in any field Interview Speak shows you how to draw on your own unique skillset and deliver answers that will make you stand out In Interview Speak you ll learn
