Classic 1950s Science Fiction Movies:

1950s Science Fiction Films and 9/11 Melvin E. Matthews, 2007 1950s Cold War era monsters meet 21st century terrorists this exploration of sci fi movies examines the similarities and differences between the political environment and popular culture of two eras This examination and appreciation of 1950s science fiction films includes behind the scenes tales about their production and many quotes from those who produced and starred in the films The author draws parallels between the Cold War fears of the 1950s and 60s and the constant terrorism alerts of the September 11th era exploring how the politics and the psychological climate of the times influences and is reflected in this vehicle of popular culture This book is the first of its kind studying the pop culture genre in the wake of the September 11th tragedy It shows that whatever the era and whatever the challenges and crises confronting America many entertainment themes remain the same reflecting their respective times and the relevant issues For instance Godzilla the only Fifties era monster to remain a movie star beyond that era could be fashioned to reflect whatever issues dominate the times be they nuclear war in the Fifties when Godzilla originated to a Seventies Godzilla film about environmental pollution Conceivably a Godzilla for the age of terrorism is possible Then the 1954 atomic mutation classic is the spiritual ancestor of the 2002 film Eight Legged Freaks The alien invaders of the Fifties signified a Russian invasion of America while other films of the genre such as Invaders from Mars depicted aliens utilizing mind control to manipulate humans to commit acts of sabotage signifying Communist enslavement If such a film were made now such invaders could be seen as terrorist masterminds using human slaves to commit terrorist acts Finally several Fifties films depicted the end of the world at a time when Americans expected a nuclear war with Russia The immediate pre September 11th era witnessed films presenting galactic threats to mankind s existence Independence Day Deep Impact Armageddon while the early 2000s witnessed the popularity of the Left Behind Christian films dramatizing the Tribulation period in the Book of Revelation

Hostile Aliens, Hollywood and Today's News Melvin E. Matthews, 2007 1950s Cold War era monsters meet 21st century terrorists Matthews provides a thoughtful interpretation of sci fi movies that examines the similarities and differences between the political environment and popular culture of two eras This well researched examination and appreciation of science fiction films includes behind the scenes tales about their production and many quotes from those who produced and starred in the films The book will tantalize not only fans of the science fiction genre but also sociologists film historians and politicians The author draws parallels between the Cold War fears of the 1950s and 60s and the constant terrorism alerts of the September 11th era exploring how the politics and the psychological climate of the times influences and is reflected in this vehicle of popular culture This book is the first of its kind studying the pop culture genre in the wake of the September 11th tragedy The alien invaders of the 1950s signified a Russian invasion of America while other films of the genre such as Invaders from Mars depicted aliens utilizing mind control to manipulate humans to commit acts of sabotage signifying Communist enslavement If such a film were made now such invaders could be

seen as terrorist masterminds using human slaves to commit terrorist acts. Then the 1954 atomic mutation classic is the spiritual ancestor of the 2002 film *Eight Legged Freaks*. Finally several 1950s films depicted the end of the world at a time when Americans expected a nuclear war with Russia. *Godzilla* the only 1950s era monster to remain a movie star beyond that era can be fashioned to reflect whatever issues dominate the times: nuclear war in the 1950s, environmental pollution in the 1970s. Conceivably a *Godzilla* for the age of terrorism is soon to be released. The immediate pre September 11th era witnessed films presenting galactic threats to mankind's existence: *Independence Day*, *Armageddon*, *Deep Impact*, while the early 2000s witnessed the popularity of the Left Behind Christian films dramatizing the Tribulation period in the Book of Revelation. It seems that whatever the era and whatever the challenges and crises confronting America, many entertainment themes remain the same, reflecting their respective times and the relevant issues.

Melvin E. Matthews Jr. is a freelance writer and a horror movie aficionado who has been studying the genre for thirty years. In this work he shares his personal correspondence with film and television star Beverly Garland and brings together a wealth of detail about the fun and the challenges of the costumes, stunts, and special effects, as well as the actors and producers' thoughts on the meaning behind the stories.

Science Fiction Gold Dennis Saleh, 1979. The best in classic 50s science fiction film: a definitive survey of fourteen great movies, each with a lavish photo essay, detailed commentary, and complete credits.

Science Fiction Film Directors, 1895-1998 Dennis Fischer, 2011-07-01. This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998. For each director, there is a complete filmography including television work, a career summary, a critical assessment, and behind-the-scenes production information. Seventy-nine directors are covered in especially lengthy entries, and a short history of the science fiction film genre is also included.

The Eternal Future of the 1950s Dennis R. Cutchins, Dennis R. Perry, 2023-07-17. Science fiction cinema, once relegated to the undervalued B movie slot, has become one of the dominant film genres of the 21st century, with Hollywood alone producing more than 400 science fiction films annually. Many of these owe a great deal of their success to the films of one defining decade: the 1950s. Essays in this book explore how classic 50s science fiction films have been recycled, repurposed, and reused in the decades since their release. Tropes from Don Siegel's *Invasion of the Body Snatchers* (1956), for instance, have found surprising new life in Netflix's wildly popular *Stranger Things*. *Interstellar* (2014) and *Arrival* (2016) have clear, though indirect, roots in the iconic 1950s science fiction films *Rocketship X-M* (1950) and *The Day the Earth Stood Still* (1951). *The Shape of Water* (2017) openly recalls and reworks the major premises of *The Creature from the Black Lagoon* (1954). Essays also cover 1950s sci-fi influences on video game franchises like *Fallout*, *Bioshock*, and *Wolfenstein*.

Invasions USA Michael Bliss, 2014-07-30. Out of more than 180 science fiction films produced in the United States between 1950 and 1959, twenty were concerned with the notion of an invasion. Of these, a select number used the invasions as metaphors for issues that were of importance to America at the time, such as assaults upon individuality and marriage and debates about

the supremacy of the human race The invasion may be real The Day the Earth Stood Still and War of the Worlds dreamed Invaders from Mars or the result of a mental breakdown as seems to be the case in Invasion of the Body Snatchers Real or not all of these massive disturbances to the status quo convey the same anxiety In the 1950s many Americans felt that things in their world weren't quite right and this sense of unease was expressed in the country's art notably these films In *Invasions USA The Essential Science Fiction Films of the 1950s* Michael Bliss examines movies that stripped away the veneer of normality during a decade often portrayed as the last innocent period in American history From a boy's nightmares about his alien controlled parents and a young woman's fears that her fiancé has been replaced by an emotionless alien to an extraterrestrial visitor who comes to warn mankind about its self destructive ways the stories of these films offer a variety of messages both subtle and overt With detailed discussions and analyses of the films in question this book examines a unique group of movies with profound messages By exploring depictions of insecurities whether personal or political Bliss shows how science fiction films spoke to American audiences deeply troubled by their circumstances *Invasions USA* will appeal to science fiction buffs and film aficionados interested in this significant phenomenon in movie and cultural history *Visions of Masculinity in 1950s Science Fiction Film* Jennifer Jill Walrad, 1991 **Keep Watching the Skies!** Bill Warren, 2009-11-30 Bill Warren's *Keep Watching the Skies* was originally published in two volumes in 1982 and 1986 It was then greatly expanded in what we called the 21st Century Edition with new entries on several films and revisions and expansions of the commentary on every film In addition to a detailed plot synopsis full cast and credit listings and an overview of the critical reception of each film Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making The book contains 273 photographs many rare 35 in color has seven useful appendices and concludes with an enormous index This book is also available in softcover format ISBN 978 1 4766 6618 1
