Helpful Hints

You must choose a 4-digit Personal Identification Number (PIN) when programming the CLK1. After programming is complete, your PIN plus any additional number must be entered to activate your system.

If an incorrect PIN is entered, the keypad flashes. When flashing stops, just re-enter the correct PIN followed by any 5th additional number. (Do not use the * or # Key)

Clear and start over: Press * and # together until keypad stops flashing. (5 one second flashes). If both keys are not pressed down at the same time, the keypad flashes 10 1/2 second flashes, followed by 5 one second flashes. This erases previous programming and returns unit to unprogrammed factory setting.

Keypad will flash: During certain programming sequences - when pressing the * or # key or an incorrect PIN is entered.

To program a second garage door opener brand after successfully programming the first: Determine brand, then follow the brand steps, choosing a different PIN and in step 1 enter 5,6,7,8 instead of 1,2,3,4. If unsuccessful, wait until keypad stops flashing, then begin at step 1. Do not clear and start over as first door programming will be erased.

Keypad will light steadily for 5 seconds: After pressing any key or after entering a correct PIN. Once programmed, the keypad remains active for 15 seconds. During this time you may stop, reverse or reactivate the door by pressing any number on the keypad.

MOUNTING THE CLK1

Select a smooth vertical surface. Mount the keypad out of the path of the moving garage door, but within sight of it. At least 4 inches of clearance is needed above the keypad in order to slide the cover up.

Slide outside cover up and remove. Remove battery cover. Take battery out of compartment (it is not necessary to disconnect it). Mount the keypad using the two mounting holes and screws supplied, then reinsert battery, replace battery cover, and slide outside cover down.

CHANGING YOUR PIN

It is not necessary to reprogram the CLK1 to change the existing PIN.

To change your PIN:

- Enter existing 4-digit PIN and the * key.
 - Enter new 4-digit PIN and the # key.
 - To test, enter new 4-digit PIN followed by any 5th additional number.
- Note:** Do not use the * or # keys as a 5th number.

Determine if your system has code switches or a smart-learn button. If your system has code switches they can be found in an original hand held remote or on the motor unit receiver. The receiver can be mounted on the side or back panel of the motor unit or could be mounted on the ceiling or wall (locate the small gray wire antenna). If you have code switches proceed to Section 1.

Note: Systems that have a yellow, white, or gray smart-learn button will have code switches in the original hand held remote. If you do not have any programmed remotes, choose a random 9 digit code using the box below.

If your hand held remotes do not contain code switches, your system will have a green or orange smart-learn button. Proceed to Section 2 and 3.
