 Automation ,1986 *Artificial Intelligence in Price Management. A Qualitative Assessment of Potentials, Risks and Impacts*
 Lennard Heyder,2024-12-05 Master s Thesis from the year 2024 in the subject Business economics Information Management
 grade 1 0 Otto Beisheim School of Management Vallendar Chair of Strategy and Marketing course Price Management
 language English abstract This thesis explores the transformative role of Artificial Intelligence AI in price management
 focusing on its impact across the four key phases strategy analysis decision making and implementation as defined by Simon
 and Fassnacht The motivation for this research arises from a gap in existing literature no conceptual framework currently
 addresses AI s specific impacts on each phase of the price management process The primary aim is to assess AI s influence
 including opportunities risks and structural changes within each phase Two research questions guide this study What phase
 specific value propositions and risk factors will AI introduce in each of the four price management phases How can these
 impacts be synthesized into a comprehensive decision making framework To address these questions a narrative literature
 review of recent studies 2022 2024 was conducted culminating in a structured framework This framework provides a cross
 industry overview of AI applications in pricing equipping organizations with a practical tool to evaluate their pricing
 strategies and make informed decisions about AI integration The framework presents a varied value risk profile across
 phases helping organizations identify where AI can best support pricing and where risks such as algorithmic bias and
 transparency issues require oversight A phased approach to AI adoption is recommended beginning with phases where AI
 supports human judgment to limit risk Higher levels of automation and decision authority can be introduced later to
 maximize efficiency and value provided there is a balanced approach to risk technological maturity and alignment with
 organizational goals **The British National Bibliography** Arthur James Wells,2001 Manus AI for Beginners
