**Supporting Grade 5-8 Students in Constructing Explanations in Science** Katherine L. McNeill, Joseph S. Krajcik, 2012 I would encourage others to use this book as a resource for a professional learning community or department discussion group and the like absolutely I would recommend it why It is simply good for our students developing understanding of science Pamela M Pelletier Senior Program Director Science K 12 Boston Public Schools Boston Massachusetts

*Effects of the Claims-evidence-reasoning Writing Framework on Teaching and Learning in Eighth Grade Science* Tanya Hobbs Long, 2014 The need for instructing science students on writing evidence based explanations arises from the importance placed on this by the Common Core State Standards for college and career readiness The Claims Evidence Reasoning C E R writing framework may be a means to this end Explanations begin with a claim which makes an assertion or a conclusion about a question problem or observation The evidence supports the claim using scientific data The reasoning part of an explanation is used to justify that the students evidence supports their claim explains why the observations or data count as evidence of this claim by providing scientific principles The framework was used with a variety of lesson types in astronomy and chemistry units Students reported that the C E R framework helped them learn science content The C E R framework also improved students understanding of the nature of science

Teaching Science in Elementary and Middle School Joseph S. Krajcik, Charlene Lochbihler Czerniak, 2007 The need for a scientifically literate population that can apply scientific ideas to solve real world problems in the 21st century has never been greater Yet a growing disconnect exists between this need and the educational capacity to prepare them The mission of *Teaching Science in Elementary and Middle School A Project Based Approach 3e* is to help answer this need Like its predecessors this new edition is organized around the guiding principles of problem based learning long term

interdisciplinary student centered lessons that are relevant to real world issues and activities This teaching approach engages all young learners regardless of culture race or gender in exploring important and meaningful questions through a process of investigation and collaboration Throughout this dynamic process students ask questions make predictions design investigations collect and analyze data make products and share ideas Changes in this new edition include the following Stronger more explicit connections between PBS inquiry teaching and the National Science Education Standards NSES The theme of establishing the relevance of science to students lives has been expanded It now includes attention to discrepant events anchoring events and experiencing phenomena in addition to its previous focus on driving questions To help children understand that science is about explaining phenomena a new chapter Making Sense of Data now follows the one on Designing and Carrying Out Investigations It contains a section on helping children create evidence based scientific explanations A new section on the challenges of special needs and gifted students The discussion of technology in science teaching have been expanded to include such new devices as wireless handhelds cameras cell phones wikis and ipods The introductory scenarios have been reworked to insure greater relevance to elementary science teaching An accompanying Web site will offer test items and strategies to support students in problem solving and in planning and carrying out investigations This text is appropriate for anyone interested in teaching elementary or middle school science using an inquiry oriented problem based framework

**Claim, Evidence, and Reasoning: Evaluation of the Use of Scientific Inquiry to Support Argumentative Writing in the Middle School Science Classroom** Gabriela Mastro, 2017 In light of the essential science and engineering practices identified by the Next Generation Science Standards NGSS this study focuses on the specific science and engineering practice engage in argument from evidence and how classroom practices can serve to strengthen this skill National Research Council 2012 p 71 The NGSS focus on inquiry necessitates students use of argument particularly in writing to communicate their knowledge and scientific findings and to develop an understanding of scientific practice The purpose of this teacher action research study is to evaluate the influence of inquiry based argumentative writing exercises based on the Argument Driven Inquiry ADI model in a middle school science classroom Sampson Grooms and Walker 2011 The ADI model while extensive and complex shows promise in building both argumentative writing skills and science content knowledge The results of this study demonstrated that modified iterations of this model should include data sets that are personally meaningful to students writing tasks scaffolded to areas of student need and clear communication of feedback from both peers and teachers focused on all three areas of scientific arguments claim evidence and reasoning Information gained from this study will benefit science educators by yielding information about how scientific argumentative writing can be most effectively implemented into the middle school classroom to yield the maximum benefit for literacy in the science curriculum

**Argumentation** Judith Aguilar, 2015 Abstract This is a thesis project aimed at creating an elementary science unit The purpose for creating this unit was so that elementary teachers who are normally not comfortable with

science content can carry out a unit that implements science processes such as argumentation without apprehension The use of science notebooks is included to help students construct arguments through the collection of data The unit starts off with process lessons for introducing the process of argumentation It is my hope that teachers will be able to take the process lessons I have created and insert it into any science unit they teach I have attached some content lessons adapted from FOSS in order to highlight how I would embed the elements of argumentation in an already established curriculum that might be used by a school district The unit was reviewed by three teachers in the field and then revised to include their suggestions
