These lecture notes on the particle physics and astrophysics of dark matter (DM) were delivered at TASI 2022 “Ten Years After the Higgs Discovery: Particle Physics Now and Future.” The focus of these lecture notes, aimed at the level of advanced graduate students and beginning postdocs, is on indirect (*i.e.*, astrophysical and cosmological) probes of particle DM models. While DM models and indirect detection are broadly discussed, the examples of weakly interacting massive particles (WIMPs) and axions are worked out in detail. The topics covered include: the role of DM in the cosmology and astrophysics of structure formation, including DM density profiles in galaxies, general constraints on particle DM models, the theory of minimal DM, with the higgsino as a relevant and illustrative example, indirect detection with gamma-rays, including with the upcoming Cherenkov Telescope Array, axions as a solution to the strong- CP problem and a DM candidate, including discussions of possible ultraviolet completions and of axion string cosmology, and astrophysical probes of axions such as with isocurvature perturbations, N_{eff} , black hole superradiance, radio telescopes, spectral modulations, stellar polarization, and stellar cooling, amongst other topics. Example Jupyter notebooks are provided that walk the reader through relevant analyses, including an example statistical analysis of a DM annihilation search towards the Segue I dwarf galaxy with gamma-ray data from the *Fermi* Large Area Telescope that is relevant for DM explanations of the *Fermi* Galactic Center Excess. We also provide an introduction to frequentist statistics for particle and astro-particle physics. These lecture notes are meant to be pedagogical, with the focus on explaining the underlying physical principles and analysis techniques that are set to play crucial roles in the search for particle DM in the coming decade.

Cross, 2020-07-28 A diehard romantic looking to start over in a small town Dr Nina Benitez might be an astrophysicist and a scientist down to her bones but she also believes in true love and happily ever after and won't settle for anything less After a rocky end to her first semester teaching at the University of Montana she's looking forward to a new school year and a fresh start in the small town of Rifle Creek When she meets her roommate's work partner a sexy hard edged detective Nina is immediately intrigued However it's soon clear they're like oil and water But when she's confronted by the painful past event she wanted to forget she faces an even greater danger A predator is bent on silencing her forever and Nina's only hope of survival is the unattainable man who's captured her heart A cynical cop determined to guard his heart Tate Baldwin has dedicated his life to serving and protecting first in the military and now as a detective in Rifle Creek Badly burned by his last relationship he isn't looking to get involved with anyone especially a brilliant college professor who seems to have her head in the clouds Yet even Tate can't deny the attraction between them that soon grows into something more And when a secret from her past triggers a lethal threat Tate will risk everything to stand between her and the monster who wants her dead

Black Holes Lawrence A. Jameson,2002 **The Politics of HBO's The Wire** Shirin Deylami,Jonathan Havercroft,2014-12-17 This innovative new work suggests that The Wire reflects not simply a cultural take on contemporary America but a structural critique of the conditions of late modernity and global capitalism As such it is a visual text worth investigating and exploring for its nuanced examination of power difference and inequality Deylami Havercroft bring together nine essays addressing issues of interest to a range of academic fields in order to engage with this important cultural intervention that has transfixed audiences and sparked debate within the social scientific community While the TV show is primarily focused upon the urban politics of Baltimore the contributors to this volume read Baltimore as a global city That is they argue that the relations between race class power and violence that the series examines only make sense if we understand that inner city Baltimore is a node in a larger global network of violence and economic inequality The book is divided into three interrelated sections focusing on systemic and cultural violence the rise and decline of national and state formations and the dysfunctional and destructive forces of global capitalism Throughout the series the relation of the urban to the global is constantly being explored This innovative new volume explains clearly how The Wire portrays this interaction and what this representation can show social scientists interested in race neo liberal processes of globalization criminality gender violence and surveillance
