Cloud Computing Venkata Josyula, Malcolm Orr, Greg Page, 2012 The complete guide to provisioning and managing cloud based Infrastructure as a Service IaaS data center solutions. Cloud computing will revolutionize the way IT resources are deployed configured and managed for years to come. Service providers and customers each stand to realize tremendous value from this paradigm shift if they can take advantage of it. Cloud Computing brings together the realistic start to finish guidance they need to plan implement and manage cloud solution architectures for tomorrow's virtualized data centers. It introduces cloud newcomers to essential concepts and offers experienced operations professionals detailed guidance on delivering Infrastructure as a Service IaaS Platform as a Service PaaS and Software as a Service SaaS. This book's replicable solutions and fully tested best practices will help enterprises service providers consultants and Cisco partners meet the challenge of provisioning end to end cloud infrastructures. Drawing on extensive experience working with leading cloud vendors and integrators the authors present detailed operations workflow examples proven techniques for operating cloud based network compute and storage infrastructure a comprehensive management reference architecture and a complete case study demonstrating rapid lower cost solutions design. Cloud Computing will be an indispensable resource for all network IT professionals and managers involved with planning implementing or managing the next generation of cloud computing services. Venkata Josh Josyula Ph D CCIE No 13518 is a Distinguished Services Engineer in Cisco Services Technology Group CSTG and advises Cisco customers on OSS BSS architecture and solutions. Malcolm Orr Solutions Architect for Cisco's Services Technology Solutions advises telecoms and enterprise clients on architecting building and operating OSS BSS and cloud management stacks. He is Cisco's lead architect for several Tier 1 public cloud projects. Greg Page has spent the last eleven years with Cisco in technical consulting roles relating to data center architecture technology and service provider security. He is now exclusively focused on developing cloud IaaS solutions with service providers and systems integrator partners. Review the key concepts needed to successfully deploy clouds and cloud based services. Transition common enterprise design patterns and use cases to the cloud. Master architectural principles and infrastructure designs for real time managed IT services. Understand the Cisco approach to cloud related technologies systems and services. Develop a cloud management architecture using ITIL TMF and ITU TMN standards. Implement best practices for cloud service provisioning activation and management.
