Number & Operations in Base Ten Standards Checklist

Standard	Not Addressed	Teaching	Mastered
4.NBT.A.1 Understand that in base ten, one digit represents ten times one as many as one digit to its right. Recognize that multiplying by 10 shifts the digits in a number one place to the left, and multiplying by 100 shifts the digits two places to the left. Recognize $1,000$ as 10×100 and 100 as 10×10 .			
4.NBT.A.2 Read and write numbers in base ten numerals and number names up to one thousand. Recognize that the number of digits in a number tells the place value of each digit.			
4.NBT.A.3 Use place value understanding to round whole numbers to the nearest ten or hundred.			
4.NBT.B.1 Add, subtract, multiply, and divide within 100. Use strategies based on place value understanding and previously learned operations. Use the relationship between multiplication and division to solve problems. For example, if $8 \times 5 = 40$, then $40 \div 8 = 5$.			
4.NBT.B.2 Fluently add and subtract within 100 using strategies based on place value understanding and previously learned operations. For example, use the relationship between addition and subtraction to solve problems. For example, if $8 + 5 = 13$, then $13 - 8 = 5$.			
4.NBT.B.3 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers. Use strategies based on place value understanding and previously learned operations. For example, use the relationship between multiplication and division to solve problems. For example, if $8 \times 5 = 40$, then $40 \div 8 = 5$.			
4.NBT.B.4 Find the quotient and remainder for division problems. Use strategies based on place value understanding and previously learned operations. For example, use the relationship between multiplication and division to solve problems. For example, if $8 \times 5 = 40$, then $40 \div 8 = 5$.

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to

meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research

Child Succeed in Fourth Grade A Parent's Guide to the Common Core Schools across America are rolling out new more rigorous curricula in order to meet the demands created by a new set of English and Mathematics standards known nationally as the Common Core State Learning Standards or Common Core You can expect to see a number of changes in

your child's fourth grade class based on the requirements of the Common Core standards. In an effort to address Common Core Reading requirements, students will now read more Informational Texts in their English Language Arts assignments. This type of passage provides facts and often deals with current events, science, and social studies. In addition, questions posed about these readings will ask students to find evidence and use it to formulate an argument. In order to master new Common Core Language Arts and Literacy standards, students will need a larger and stronger vocabulary to allow them to both tackle complex readings and write acceptable arguments. To address Common Core Math requirements, students will spend more time developing their understanding of specific and important math concepts. Students will be expected to both demonstrate understanding of each topic and apply their mathematical skills to real-world situations. As a parent, it is important not only to understand the new Common Core 4th grade standards but also to have the tools to help your child do his or her best in school. This Common Core workbook book is designed to provide you with the guidance and resources to support classroom learning and help your child succeed. It includes an annotated review of the standards highlighting what your child should master during fourth grade, 20 important lessons that you can do together with your child to support them as they progress through the school year, a Vocabulary section designed to make sure your child masters the most important academic words, 200 practice questions to improve your child's skills, a Diagnostic quiz, and 20 mini quizzes to check for understanding.
