types of presentations is not only necessary for a student's preparation for collegiate work but is truly a requisite life skill. This book provides a solid guided inquiry curriculum for cultivating the skills needed to properly investigate a subject in the humanities: interrogate both textual and non-textual sources, interpret the information, develop an understanding of the topic, and effectively communicate one's findings. It is a powerful and practical guide for high school humanities teachers, school librarians, community college humanities teachers and librarians, and early college level humanities instructors, as well as for high school and college students who want to learn how to conduct and write up humanities research. Part one comprises a teacher's practicum that explains the power of guided inquiry. Part two contains student's workshops with instructions and materials to conduct a guided humanities project and paper on the high school level. The third part provides materials for a professional development session for this assignment, as well as assessment tools and other supplementary materials such as student handouts. Based on the authors' 15 years experience in teaching guided inquiry, the 20 workshops in the book use a step-by-step constructivist strategy for teaching a sophisticated humanities project that enables college readiness.

Singer, 2014-10-08 Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to online essays about related social studies topics. Activities are followed by four categories: Think it over, Add your voice to the discussion, Try it yourself, and It's your classroom. All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-

service training programs as a reference for new social studies teachers and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data driven standards based instruction especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on line material linked to the text Resources in Vocational Education ,1980
