Management Accounting in a Dynamic Environment Cheryl S. McWatters, Jerold L. Zimmerman, 2015-12-22
Whether students pursue a professional career in accounting or in other areas of management they will interact with accounting systems. In all organizations managers rely on management accounting systems to provide information to deal with changes in their operating environment. This book provides students and managers with an understanding and appreciation of the strengths and limitations of an organization's accounting system and enables them to be intelligent and critical users of the system. The text highlights the role of management accounting as an integral part of the organization's strategy and not merely a set of individual concepts and computations. An analytical framework for organizational change is used throughout the book to underscore how organizations must adapt to create customer and organizational value. This framework provides a way to examine and analyze the organization's accounting system and as a basis for evaluating proposed changes to the system. With international examples that bring the current business environment to the forefront, problems and cases to promote critical thinking and online support for students and instructors, *Management Accounting in a Dynamic Environment* is no mere introductory textbook. It prepares readers to use accounting systems intelligently to achieve organizational success. The authors have identified several cases to accompany each chapter in the textbook. These are available through Ivey Publishing: <https://www.iveycases.com/CaseMateBookDetail.aspx?id=434> *Turnaround Leadership* Shaun O'Callaghan, 2010-06-03. If you are a leader at some point in your management career, you will have to face times when business conditions turn against you. This may be as a result of technology changes, a recession, or company-specific issues such as a powerful competitor entering the market. When this happens, you will need to know how to guide your company through the tough times and profit from the changes that are happening. This book will give you the tools you need to use to make decisions and lead and motivate your staff and communicate with your customers, investors, lenders, and teams. As a business leader, this book will show you how to make the right decisions in this new environment, communicate those decisions effectively, and deliver results.
