*Stock Market Investing for Beginners & Dummies* Giovanni Rigters, 2018 You know that you need to start investing because you won t be able to work your whole life You don t want to be the old employee working as a door greeter at your big chain department store It will also be frustrating and very depressing if you are not financially aware of your future Time seems to go faster the older you get and it s never too late to get started But getting started might be one of your problems There is too much information available and too many scammers are trying to get you to invest in shady companies You also don t have the time to figure everything out by yourself

because it might seem too hard and complicated However getting the investing part of your life handled will improve your life tremendously You will have peace of mind when you think about your future and you will also have the confidence to make sound investing decisions You ll also have the knowledge to talk intelligently with your peers and financial advisors making it easy to spot when someone is giving you wrong information I begin with the basics like what are stocks and how the stock market works I then transition into how you can make money in the stock market give you some stocks you should have on your watch list and some of the lies and mistakes you will have to deal with as an investor So don t wait and get this book now It s on sale at this moment but the price will go up **Investing for Beginners** Mark Kratter,2021-05-16 55% OFF for Bookstores NOW at 23 95 instead of 37 95 Do you want to maximize your profit and make money with this guide for beginners and advanced traders Your Customers Will Never Stop To Use This Awesome Book A stock is basically a share of the company A share refers to a part of the company including its finances and every other asset that it owns When the company decides to go public with its shares it announces an IPO or initial public offering Anybody interested in buying the shares will then approach the company and pay the share value to own the shares This is known as primary selling These shares are then sold in the share market The share market is a huge place where buyers and sellers converge to conduct daily trade These shares are then bought and sold and the seller capitalizes on the current price of the share which will be much higher than what he had bought it at The buyer will have the chance to capitalize on the share once its value rises Companies decide to go public with their shares due to many reasons But the main reason is to raise capital for their business So they will value their company and split the shares They will then value individual shares depending on their market capture and asset to liability ratio A small company might capture a big market share and a big company might capture a small share It depends on the individual company s board members decision The stock market is huge and there are many companies that list their shares As an investor you must choose the best one for yourself and invest wisely Wanted to learn about how to invest in stock market This book is for you This book covers Information about the Stock Market Understanding the Basics of Investing in Stocks Types of Brokers Fundamental Analysis Technical Analysis And much more What are you waiting for BUY IT NOW and let your customers get addicted to this amazing book **Stock Investing for Beginners** Bradley Banks,2019 As an investor the stock market offers you the opportunity to increase your income without taking on the high risks that are usually associated when venturing in other businesses By selling stocks the company raises capital and is able to expand itself exponentially Therefore as an investor when you purchase shares of a company you have increased the worth of the company Thus it s a win win situation for both investor and owner The negative risk associated with the stock market can be small or large but it all depends on the number of shares of stock that you as an investor have bought Therefore if a company s stock shares lose value the stocks you have bought also loses value and if you decide to sell your stocks when the value is low you will have incurred a loss I will show you how you can minimize your risks and show you
