Economics 2march Common Test Kzn Guidelines

ML Morrison

Economics 2march Common Test Kzn Guidelines:

Child Rights and International Discrimination Law Marit Skivenes, Karl Søvig, 2019-02-22 Societies and states are at a crossroad in how children are treated and how their rights are respected and protected Children's new position and their strong rights create tensions and challenge the traditional relationships between family and the state The United Nations Convention on the Rights of the Child was adopted unanimously by the General Assembly of the United Nations in 1989 and came into force in 1990 Article 2 places states under an obligation to accord primacy to the best interests of the child in all actions concerning children and to ensure and regulate child protection This book offers a comparative and critical analysis of the implementation of Article 2 of the United Nations Convention on the Rights of the Child In order to examine how Article 2 is being implemented it is essential to have a sound understanding of the obligations it imposes The opening chapters will explore the precise content of these obligations in terms of the legislative history of the text its underlying philosophy its amplification by the United Nations Committee on the Rights of the Child and subsequent authoritative interpretations of it by courts around the world The book will then drill down into the conceptual and theoretical challenges posed by the very nature of the obligations and will offer in depth exploration of the long running rights v welfare debate that has always presented something of a challenge in giving effect to children's rights Contributors are leading academics in the children's rights field drawn from a wide range of countries and jurisdictions worldwide including those with common law civilian and mixed traditions Disciplines represented in the book include law psychology political science childhood studies social work and anthropology By drawing together the various facets of Article 2 and analysing it from a range of perspectives the volume provides a coherent and comprehensive inter disciplinary analysis on discrimination and the rights of the child 3rd Economic & Social Rights Report, 1999-2000 South African Human Rights Commission, 2001

Routledge Handbook of Political Corruption Paul M. Heywood, 2014-12-17 Since the early 1990s a series of major scandals in both the financial and most especially the political world has resulted in close attention being paid to the issue of corruption and its links to political legitimacy and stability Indeed in many countries in both the developed as well as the developing world corruption seems to have become almost an obsession Concern about corruption has become a powerful policy narrative the explanation of last resort for a whole range of failures and disappointments in the fields of politics economics and culture In the more established democracies worries about corruption have become enmeshed in a wider debate about trust in the political class Corruption remains as widespread today possibly even more so as it was when concerted international attention started being devoted to the issue following the end of the Cold War This Handbook provides a showcase of the most innovative and exciting research being conducted in Europe and North America in the field of political corruption as well as providing a new point of reference for all who are interested in the topic The Handbook is structured around four core themes in the study of corruption in the contemporary world understanding and defining the

nature of corruption identifying its causes measuring its extent and analysing its consequences Each of these themes is addressed from various perspectives in the first four sections of the Handbook whilst the fifth section explores new directions that are emerging in corruption research The contributors are experts in their field working across a range of different social science perspectives

Comparative Human Rights Law Sandra Fredman,2018-11-08 Courts in different jurisdictions face similar human rights questions Does the death penalty breach human rights Does freedom of speech include racist speech Is there a right to health This book uses the prism of comparative law to examine the fascinating ways in which these difficult questions are decided On the one hand the shared language of human rights suggests that there should be similar solutions to comparable problems On the other hand there are important differences Constitutional texts are worded differently courts have differing relationships with the legislature and there are divergences in socio economic development politics and history Nevertheless there is a growing transnational conversation between courts with cases in one jurisdiction being cited in others Part I sets out the cross cutting themes which shape the ways judges respond to challenging human rights issues It examines when it is legitimate to refer to foreign materials how universality and cultural relativity are balanced in human rights law the appropriate role of courts in adjudicating human rights in a democracy and the principles judges use to interpret human rights texts The book is unusual in transcending the distinction between socio economic rights and civil and political rights Part II applies these cross cutting themes to comparing human rights law in the US UK South Africa Canada and India Its focus is on seven particularly challenging issues the death penalty abortion housing health speech education and religion with the aim of inspiring further comparative examination of other pressing human rights issues
