*Introduction to the Social Sciences (RLE Social Theory)* Maurice Duverger, 2020-09-10 Professor Duverger at last provides the student with an overall view of the methodology of the social sciences He briefly traces the origin of the notion of a social science showing how it emerged from social philosophy Its essential elements and pre conditions are described the splintering of social science into specialist disciplines is explained and the need for a general sociology confirmed The techniques of observation used by social scientists are dealt with in some detail and the unity of the social sciences is illustrated by examples of the universal application of these techniques Documentary evidence in its various forms are described along with the basic analytical techniques including quantitative methods and content analysis Other methods of gathering information through polls interviews attitude scales and participant observation are all described Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered Arguing that observing and theorizing are not two different stages or levels of research he examines the practical value and

difficulties of general sociological theories partial theories and models and working hypotheses He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences He then gives elementary instructions for using and assessing the value of mathematical techniques The possibilities of presenting social phenomena through graphs and charts are also explored There are useful book lists and diagrams *Ruling Minds* Erik

Linstrum,2016-01-04 The British Empire used intelligence tests laboratory studies and psychoanalysis to measure and manage the minds of subjects in distant cultures Challenging assumptions about the role of scientific knowledge in the exercise of power Erik Linstrum shows that psychology did more to reveal the limits of imperial authority than to strengthen it **International Histories of Psychological Assessment** Sumaya Laher,2022-08-11 To look forward it is necessary to

look back and learn History is more than just facts about the past it is a narrative told from a particular perspective A proverb from Africa Until lions have their own historians tales of the hunt shall always glorify the hunter captures this best Most of the scholarship about psychological assessment comes from very specific nationalities and cultures which does not truly reflect the diversity and breadth of histories pertaining to the field Covering 50 countries this collection gives voice to those that have previously been under represented and sometimes marginalized This book not only describes important moments in psychological assessment from around the globe but also equips readers with the tools to map the future of psychological assessment across nations It advocates for a more globally inclusive science of assessment that holds promise for enhancing creativity and innovation in the field Introduction to Measurement Theory Mary J. Allen,Wendy M.

Yen,2001-12-14 Introduction to Measurement Theory bridges the gap between texts that offer a mathematically rigorous treatment of the statistical properties of measurement and ones that discuss the topic in a basic cookbook fashion Without overwhelming novices or boring the more mathematically sophisticated the authors effectively cover the construction of psychological tests and the interpretation of test scores and scales critically examine classical true score theory and explain theoretical assumptions and modern measurement models controversies and developments Practical applications examples and study questions facilitate a better understanding of the uses and limitations of common measures of test reliability and validity and how to perform the basic item analysis necessary for test construction Military Psychology Carrie H.
