Future U.S. Workforce for Geospatial Intelligence National Research Council, Policy and Global Affairs, Board on Higher Education and Workforce, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on the Future U.S. Workforce for Geospatial Intelligence, 2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare, conflicts between agents with different military powers or tactics, and social unrest. Visually depicting and assessing these threats using imagery and other geographically referenced information is the mission of the National Geospatial Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas: geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis; and 5 emerging areas that could improve geospatial intelligence: GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting. The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

Changing Altitudes Big Sky Publishing, 2024-10-02 In the early years of the Second World War, Australian women began lobbying to contribute to the nation's wartime effort. From 1940, women were signing up to serve in the Royal Australian Nursing Service, and in 1941 an Auxiliary arm of the Royal Australian Air Force was established, allowing women to join on a temporary basis to enhance the organisation's ability to fight. In the decades since, Australian women have continued to contribute significantly to the operational capability of the world's second oldest air force. They have done so regardless of the social norms of the time or the perceived limits of their abilities, always showing their detractors that they are capable of great things. *Changing Altitudes: The Stories of Australian Air Force Women* includes the personal stories of some of these women, recounting in their own words their experiences while proudly wearing the uniform of the Service. This is the second volume of the Royal Australian Air Force Oral Histories series, aiming to capture the
