Canonizing Hypertext Explorations And Constructions Astrid Ensslin:

Canonizing Hypertext Astrid Ensslin, 2007-07-09 This innovative monograph focuses on a contemporary form of computer based literature called literary hypertext a digital interactive communicative form of new media writing Canonizing Hypertext combines theoretical and hermeneutic investigations with empirical research into the motivational and pedagogic possibilities of this form of literature It focuses on key questions for literary scholars and teachers How can literature be taught in such a way as to make it relevant for an increasingly hypermedia oriented readership How can the rapidly evolving new media be integrated into curricula that still seek to transmit traditional literary competence How can the notion of literary competence be broadened to take into account these current trends This study which argues for hypertext s integration in the literary canon offers a critical overview of developments in hypertext theory an exemplary hypertext canon and an evaluation of possible classroom applications

The Cambridge Companion to Postmodern American Fiction Paula Geyh, 2017-04-24 Few previous periods in the history of American literature could rival the richness of the postmodern era the diversity of its authors the complexity of its ideas and visions and the multiplicity of its subjects and forms This volume

It traces the development of postmodern American fiction over the past half century and explores its key aesthetic cultural and political contexts. Style and Reader Response Alice Bell, Sam Browse, Alison Gibbons, David Peplow, 2021-02-08. *Style and Reader Response* Minds media methods profiles the diversity of theoretical and methodological approaches in reception oriented research in stylistics. Collectively the chapters investigate how real readers, players, audiences and viewers respond to experience and interpret texts. Contributions to the book investigate discourse types such as contemporary literature, poetry, political speeches, digital fiction, art exhibitions and online news discourse. The volume also exemplifies the variety of empirical approaches in reception research with contributors drawing on a range of methods including discussion groups, interviews, questionnaires and think aloud protocols with data analysed from both online and offline sources. *Style and Reader Response* makes an important contribution to an emerging paradigm within stylistics in which verifiable insights from readers are used to generate new models and new understandings of texts across media with each essay demonstrating the centrality of empirical research for theoretical, methodological and/or analytical advancements within and beyond stylistics.

Reading Moving Letters Roberto Simanowski, Jörgen Schäfer, Peter Gendolla, 2015-07-15. Digital media is increasingly finding its way into the discussions of the humanities classroom. But while there is a number of grand theoretical texts about digital literature, there as yet is little in the way of resources for discussing the down to earth practices of research, teaching and curriculum necessary for this work to mature. This book presents contributions by scholars and teachers from different countries and academic environments who articulate their approach to the study and teaching of digital literature and thus give a broader audience an idea of the state of the art of the subject matter also in international comparison.

New Narratives Ruth Page, Bronwen Thomas, 2011-12-01. Just as the explosive growth of digital media has led to ever expanding narrative possibilities and practices, so these new electronic modes of storytelling have in their own turn demanded a rapid and radical rethinking of narrative theory. This timely volume takes up the challenge deeply and broadly considering the relationship between digital technology and narrative theory in the face of the changing landscape of computer mediated communication. *New Narratives* reflects the diversity of its subject by bringing together some of the foremost practitioners and theorists of digital narratives. It extends the range of digital subgenres examined by narrative theorists to include forms that have become increasingly prominent: new examples of experimental hypertext and contemporary video games. The collection also explicitly draws connections between the development of narrative theory, technological innovation and the use of narratives in particular.

social and cultural contexts Finally *New Narratives* focuses on how the tools provided by new technologies may be harnessed to provide new ways of both producing and theorizing narrative Truly interdisciplinary the book offers broad coverage of contemporary narrative theory including frameworks that draw from classical and postclassical narratology linguistics and media studies **English and American Studies in German** Paul Georg Meyer, 2007 Linguistics and Language Behavior Abstracts , 2009-04 **Book Review Index - 2009 Cumulation** Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **MLA International Bibliography of Books and Articles on the Modern Languages and Literatures** , 2007 **The Language of Gaming** Astrid Ensslin, 2017-09-16 This innovative text examines videogames and gaming from the point of view of discourse analysis In particular it studies two major aspects of videogame related communication the ways in which videogames and their makers convey meanings to their audiences and the ways in which gamers industry professionals journalists and other stakeholders talk about games In doing so the book offers systematic analyses of games as artefacts and activities and the discourses surrounding them Focal areas explored in this book include Aspects of videogame textuality and how games relate to other texts the formation of lexical terms and use of metaphor in the language of gaming Gamer slang and buddylects The construction of game worlds and their rules of gamer identities and communities Dominant discourse patterns among gamers and how they relate to the nature of gaming The multimodal language of games and gaming The ways in which ideologies of race gender media effects and language are constructed Informed by the very latest scholarship and illustrated with topical examples throughout *The Language of Gaming* is ideal for students of applied linguistics videogame studies and media studies who are seeking a wide ranging introduction to the field *An Exploration of Automatic Hypertext Construction* Patrick J.
