Cwi Practical Model Paper:

Theory and Practice of Model Transformations Pieter Van Gorp, Gregor Engels, 2016-06-21 This book constitutes the refereed proceedings of the 9th International Conference on Model Transformation ICMT 2016 held in Vienna Austria in July 2016 as Part of STAF 2015 the federation of a number of the leading conferences on software technologies The 13 revised papers were carefully selected from 36 submissions The papers are organized in topical sections on model transformation languages model transformation tools developing model transformations applications of model transformations and looking ahead

Theory and Practice of Formal Methods Erika Ábrahám, Marcello Bonsangue, Einar Broch Johnsen, 2016-03-12 This Festschrift volume has been published in honor of Frank de Boer on the occasion of his 60th birthday Frank S de Boer is a prominent member of the research community in formal methods and theoretical computer science A brief look at his lengthy publication list reveals a broad area of interest and a versatile modus operandi with logic and constraint programming deductive proof systems soundness and completeness semantics compositionality and full abstraction process algebra and decidability multithreading and actor based concurrency agent programming ontologies and modal logic real time systems timed automata and schedulability enterprise architectures choreography and coordination testing and runtime monitoring and cloud computing and service level agreements For a while he also liked failures especially in semantics and optimistically concluded with the failure of failures In fact Frank has an opportunistic approach to research Rather than seeing obstacles he finds opportunities

Theory and Practice of Model Transformations Antonio Vallecillo, Jeff Gray, Alfonso Pierantonio, 2008-07-01 Models have become essential for dealing with the numerous aspects involved in developing and maintaining complex IT systems Models allow capturing of the relevant aspects of a system from a given perspective and at a precise level of abstraction In addition to models the transformations between them are other key elements in model driven engineering Model transformations allow the definition and implementation of the operations on models and also provide a chain that enables the automated development of a system from its corresponding models Furthermore model transformations may be realized using models and are therefore an integral part of any model driven approach There are already several proposals for model transformation specification implementation and execution which are beginning to be used by modeling practitioners However model transformations need specialized support in several aspects in order to realize their full potential The problem goes beyond having specific languages to represent model transformations we also need to understand their foundations such as the key concepts and operators supporting those languages their semantics and their structuring mechanisms and properties e.g modularity composability and parametrization In addition model transformations can be stored in repositories as reusable assets where they can be managed discovered and reused There is also a need to chain and combine model transformations in order to produce new and more powerful transformations and to be able to implement new operations on models Finally model transformations need methodology support i.e they need to be integrated

into software development methodologies supported by appropriate tools and environments These issues and concerns define the focus of these proceedings

Principles and Practice of Constraint Programming - CP 2003 Francesca Rossi, 2003-11-18 This volume contains the proceedings of the Ninth International Conference on Principles and Practice of Constraint Programming CP 2003 held in Kinsale Ireland from September 29 to October 3 2003 Detailed information about the CP 2003 conference can be found at the URL <http://www.cs.ucc.ie/cp2003> The CP conferences are held annually and provide an international forum for the latest results on all aspects of constraint programming Previous CP conferences were held in Cassis France in 1995 in Cambridge USA in 1996 in Schloss Hagenberg Austria in 1997 in Pisa Italy in 1998 in Alexandria USA in 1999 in Singapore in 2000 in Paphos Cyprus in 2001 and in Ithaca USA in 2002 Like previous CP conferences CP 2003 again showed the interdisciplinary nature of computing with constraints and also its usefulness in many problem domains and applications Constraint programming with its solvers languages theoretical results and applications has become a widely recognized paradigm to model and solve successfully many real life problems and to reason about problems in many research areas

G. Elsendoorn, Herman Bouma, 1989 This book devotes attention to both theoretical and applied problems simultaneously Many applied problems turn out to be very difficult and they often need deep theoretical insight in order to get solved In fact applied problems often serve as a source of inspiration for theoretical work since they usually are beyond reach of present theories and may show us in what direction theories need to be developed The layout of the book is a reflection of the three main areas of research at the Institute for Perception Research Hearing and Speech Vision and Reading Cognition and Communication Following the set up of the workshop the organization of the papers is in pairs such that the odd numbered chapters are generally reactions to the even numbered chapters **Proceedings of the ...
