letters are similar in appearance especially b and d On the other hand cursive letters look very different from their print counterparts This gives dyslexic students another choice which can reduce their dyslexic impulses and make them more confident in their capabilities Cognitive skills and natural flow The flow of cursive writing comes much more naturally to children as compared to print writing and engages greater cognitive skills This cognitive development helps students reason problem solve conceptualize and make decisions as they get older Cursive writing progresses fine motor skills such as coordination development of muscles and hand eye synchronization Additionally cursive writing s letter strokes aid in the eyes left to right reading motion Cursive is also productive for note taking because a word in cursive is one entire block instead of a stop and start series of strokes This productive and efficient way of taking notes assists students in grasping information greater than typing The phrase we all have been using Write it down or you ll forget it is very true Scientific studies on Neuropsychology suggest that the act of listening and handwriting links the verbal and spatial processing regions of the brain strengthening memory The overall excellence of syntax and writing is improved by this ability to reconstruct thought ideas and lectures into written words contrasted to those who type
