In this book he offers one such thinking tool a unique seven step system called the Goal Planning System GPS and explains the science behind it When applied to retirement planning this system helps readers identify what they value most what they want to achieve in retirement and ultimately who they really are By going through GPS readers will then have a solid foundation upon which to build a tailored action plan that can help them attain their goals To illustrate the impact GPS can have Thinking Smarter considers the cases of Phillip and Francesca actual retirees and the action plans they developed after using GPS For example Spend More Today While many people spend too much and outlive their assets Phillip discovered that he errs on the side of spending too little so he will plan to spend more on something he values a lot traveling with his wife Claim More Tomorrow GPS taught Francesca that she places a high value on financial independence An action plan that makes sense for her is to reap the financial benefit derived from deferring Social Security until she s seventy rather than claiming it as soon as she becomes eligible at age sixty two Thinking Smarter will become your indispensable guide to making better life decisions and achieving the future you really want
