### **Survey of College Students 2025, Use of College Instruction about Generative AI** Primary Research

Group,2025-02-12 The study looks at how students are engaging with generative AI through institutional resources The study details use of courses websites online tutorials and other means to learn about how to use generative artificial intelligence The survey highlights the varying levels of usage and the reliance on formal and informal learning methods among college students Results are based on a 2025 representative survey of 1022 students at 4 year colleges and research universities in the USA Jus a few of this 155 page report s many findings are that 30 14% of students have used academic resources provided by their institution to learn about generative AI Students at higher cost institutions 20 000 are more likely 36 03% to use academic resources compared to those at lower cost institutions 27 34% Private school students 35 90% are significantly more likely to use resources compared to public school students 28 43% International students were more avid users than domestic students of college instructional resources about generative AI Student complaints about being unable to find information about how to use AI were quite common Students face challenges such as lack of awareness institutional discouragement and unclear policies on AI use They express a need for more structured education clear guidelines and greater access to AI tools The survey suggests that while institutional resources for learning about generative AI exist most students rely on informal methods such as peers AI tools and online content There is a clear need to expand structured AI education to better support student learning *Global Education Monitoring Report* Global Education Monitoring Report Team,UNESCO,2025-08-13

[The Politics of Generative Artificial Intelligence in Empowering Education](#) Jian Li, **Reader Bot** Naomi S. Baron,2026-01-20 What happens to human reading when AI bots can do it for us Explosive developments in artificial intelligence have awed everyday users with the technology s ability to draw do computer coding and especially to write Those AI generated essays and poems legal briefs and responses to requests for information are all visible evidence of large language models at work What we don t see is the critical prior step before it can write AI needs to read While AI s written outcomes are remarkably similar to what a diligent student lawyer or researcher might produce AI doesn t read the way that humans do Now that AI is proving an adept reader what happens to our own reading skills and motivations especially at a time when both voluntary and school reading are increasingly on the decline We have learned that when we let chatbots write for us there are pros and cons to handing over our virtual pens It s critical that we also think through the consequences of relinquishing reading a deeply human activity to bots What do we stand to gain and lose when we let AI read for us Tracing the intersecting trajectories of AI and reading Reader Bot tackles this vital question revealing why we must be thoughtful about how we welcome AI as reader into our lives **AI and New Forms of Exclusion** González

Alvarado, Tania Elena,Lampón, Jesús F.,2025-07-25 As a society we have made progress in raising awareness of exclusion how to avoid it and in creating inclusive mechanisms This has involved the visibility of citizen science All of this is in parallel

with the advances in computer systems artificial intelligence AI large databases and the systematization of services A contradictory world has been created in which a new social exclusion is born due to computer biases and poor data quality in contrast to a society with greater sensitivity to these issues It is essential to address these challenges through social economic and environmental dimensions AI and New Forms of Exclusion explore the contradictions of inclusion in the face of a more sensitive society accustomed to virtual life This book discusses how AI affects decision making and how it has been integrated into public systems Covering topics such as algorithmic discrimination machine learning and social responsibility this book is an excellent resource for entrepreneurs investors academicians students policymakers and more

□**AI Art: Perspectives on Artistry and Creation**□ Etienne Noumen, This podcast and sources included explore the complex impact of artificial intelligence on art and creativity addressing the debate around whether individuals using AI tools can be considered artists and exploring the emerging skills involved like prompt engineering and curation They examine the ethical concerns surrounding AI art including job displacement and the use of training data scraped from existing artwork while also navigating the challenging legal landscape of copyright for AI generated content noting the US position that purely AI art is not copyrightable The podcast highlights how online discussions reflect societal anxieties about automation and the devaluation of human skill posing philosophical questions about intentionality and the future of human creativity in a technologically evolving world
