

Introduction to the Course

Introduction to the Course

The course is designed to provide a solid foundation in the principles of physics, covering the topics of mechanics, electricity, magnetism, and modern physics. The course is divided into two main parts: the first part covers the fundamentals of physics, and the second part covers the applications of physics to modern technology. The course is designed to be challenging and to provide a strong foundation for students who wish to pursue a career in physics or engineering.

**Prerequisites:** Students must have completed high school physics and mathematics (algebra and trigonometry) before enrolling in this course. Students who have completed these prerequisites may be exempted from some of the course material.

Part 1: Fundamentals of Physics

1. Kinematics: Describes the motion of objects without regard to the forces causing the motion. Topics include displacement, velocity, and acceleration.
2. Dynamics: Describes the forces that cause objects to move. Topics include Newton's laws of motion and the concept of energy.
3. Statics: Describes the forces that act on objects that are at rest or moving with constant velocity.
