New Challenges and Future Perspectives in Nutrition and Sustainable Diets in Africa Hettie Carina Schönfeldt, Gloria Essilfie, Yunyun Gong, 2024-05-06. Africa is confronted with the triple burden of malnutrition; it is also faced with the triple challenges of poverty, inequality, and unemployment. In many African countries, large proportions of the population rely on agriculture, not only for their food but also for their livelihoods. A transformed agricultural and food system is thus a necessary condition for addressing this double/triple challenge. Additionally, post-harvest and food waste and losses reduce the availability of sufficient quantities of safe, edible, and preferable foods. At least one-third of food produced at farm level is lost due to inappropriate storage infrastructure and agro-

processing technologies in developing countries and one third of food purchased is wasted at household and retail level
