BCBA Exam 5th Edition

A-1 Identify the goals of behavior analysis as a science (i.e., description, prediction, control)

Basic concepts regarding the observation of behavior and events

Description – Facts about the event or behavior that are observable and examinable

Ex. What does the behavior look like? What happens before, during, and after?

Ex. You describe your night to a friend. You tell them where you went, who was there, and what you ate

Ex. You define hand flapping as "repeated movements of the hands up and down lasting longer than 5 seconds"

Prediction – Repeated observations show two events correlate with each other. Suggest possible causal relations, but no functional relation because no variables are manipulated

These events correlate with each other. You can predict these events occurring.

Ex. You leave at 7am to get to work because traffic doesn't get bad until 745am

Ex. You are sure that if you present your client with a task demand, they will attempt to elope from the room

Control – The highest level of understanding. A functional relation between the IV and DV

You have control over the behavior occurring or not occurring

Ex. Reinforcement (IV) reliably increases behavior (DV). There is control.

Ex. Your boyfriend always eats your French fries. If you add pepper to your fries, your boyfriend won't touch them. You add pepper, and he doesn't eat your fries.

A-02 Explain the Philosophical Assumptions Underlying the Science of Behavior Analysis

These are shared assumptions regarding "how the world works."

Selectionism – Behaviors are selected (keep or get rid of) based on environmental factors

3 Types

Phylogenic – Selection by natural evolution of species

Ontogenic – Selection due to interaction with the environment

Cultural – Behavior is passed from one person to the next (imitation/modeling)

Determinism – The universe is lawful and orderly. Things do not happen accidentally. Things happen for a reason.

Ex. There is an explanation for a vase falling off the shelf even though no one is around
