Design of Experiments for

Engineers and Scientists Jiju Antony, 2003-09-05 The tools and technique used in the Design of Experiments DOE have been proved successful in meeting the challenge of continuous improvement over the last 15 years However research has shown that applications of these techniques in small and medium sized manufacturing companies are limited due to a lack of statistical knowledge required for their effective implementation Although many books have been written in this subject they are mainly by statisticians for statisticians and not appropriate for engineers Design of Experiments for Engineers and Scientists overcomes the problem of statistics by taking a unique approach using graphical tools The same outcomes and conclusions are reached as by those using statistical methods and readers will find the concepts in this book both familiar and easy to understand The book treats Planning Communication Engineering Teamwork and Statistical Skills in separate chapters and then combines these skills through the use of many industrial case studies Design of Experiments forms part of the suite of tools used in Six Sigma Key features Provides essential DOE techniques for process improvement initiatives Introduces simple graphical techniques as an alternative to advanced statistical methods reducing time taken to design and develop prototypes reducing time to reach the market Case studies place DOE techniques in the context of different industry sectors An excellent resource for the Six Sigma training program This book will be useful to engineers and scientists from all disciplines tackling all kinds of manufacturing product and process quality problems and will be an ideal resource for students of this topic Dr Jiju Anthony is Senior Teaching Fellow at the International Manufacturing Unit at Warwick University He is also a trainer and consultant in DOE and has worked as such for a number of companies including Motorola Vickers Procter and Gamble Nokia Bosch and a large number of SMEs Provides essential DOE techniques for process improvement initiatives Introduces simple graphical techniques as an alternative to advanced statistical methods reducing time taken to design and conduct tests Case studies place DOE techniques in the context of different industry sectors

Data Mining Algorithms Pawel Cichosz, 2015-01-27 Data Mining Algorithms is a practical technically oriented guide to data mining algorithms that covers the most important algorithms for building classification regression and clustering models as well as techniques used for attribute selection and transformation model quality evaluation and creating model ensembles The author presents many of the important topics and methodologies widely used in data mining whilst demonstrating the internal operation and usage of data mining algorithms using examples in R **Radiology**
