

100% Effective Keyword Research Strategy

STEP 01

Define Goals

One goal of keyword research may be to increase organic traffic to the website by targeting high-volume keywords relevant to the business.

Brainstorm Seed Keywords

If the business is an online shoe store, seed keywords could include "running shoes," which is a broad and commonly searched term.

STEP 02

STEP 03

Use Keyword Research Tools

Utilize Google Keyword Planner to gather data on search volume and related keywords for the seed keyword "running shoes."

Analyze Competitor Keywords

Identify a top competitor in the industry, such as an established online shoe retailer, and analyze the keywords they are targeting, such as "best running shoes for beginners" or "discount running shoes."

STEP 04

STEP 05

Evaluate Keyword Relevance

Review the gathered keywords and assess their relevance to the business's offerings. Consider if the keywords accurately represent the types of running shoes the business sells and if they align with the target audience's intent.

Consider Long-Tail Keywords

Instead of targeting the broad keyword "running shoes," consider a long-tail variation like "women's lightweight running shoes with arch support," which is more specific and captures a niche audience.

STEP 06

STEP 07

Refine and Prioritize

Refine the keyword list by eliminating irrelevant or low-performing keywords and prioritize those with higher relevance and search volume, such as focusing on keywords related to specific shoe categories or unique selling points.

Basics For Keywords Effective Keyword Research

William B. Badke

Basics For Keywords Effective Keyword Research:

Basics for Keywords Bob Franklin, 2015-01-03 Keywords form the focal point of this book so we will start looking at keywords in more depth and detail very soon However before doing so there is something very important to mention You take a look at their website and their business and all you can see is uber professionalism and perfection
