

CAUTION: CERTAIN LARGE, CIRCULAR OR IRREGULARLY SHAPED OBJECTS MAY REQUIRE ADDITIONAL HOLDING MEANS IF THEY CANNOT BE HELD SECURELY IN VISE.
CAUTION: DO NOT CUT MAGNESIUM WITH THIS TOOL. Damage to the saw and personal injury may result.

NOTE: Capacity shown on chart assumes no wheel wear and optimum fence position.

MAXIMUM CUTTING CAPACITY

Cutting Angle	Workpiece Shape				
90°		5" 127 mm	4.3" 119.4 mm	4.5" x 6.5" 114 x 165 mm 3" x 9" 76 x 228.6 mm	5.6" 142.2 mm

Standard Equipment

- 1 14" (355 mm) metal cutting abrasive wheel
- 1 Allen wrench
- 1 Instruction manual

To Carry (Fig. 1)

Fold down unit to position where you can carry the saw. Push in lock pin (A) to lock arm down.

Unlocking (Fig. 1)

To unlock tool and raise head, depress motor arm slightly and pull lock pin (A) out. Motor arm will then pivot upward.

Material Clamping and Supporting

- Angles are best clamped and cut with both legs resting against base.
- A spacer block slightly narrower than the workpiece can be used to increase wheel clearance (Fig. 3).
- Long workpieces must be supported by a block so it will be level with top of base (Fig. 4). The cut-off end should be free to fall downward to avoid wheel binding.

Spark Deflector Adjustment (Fig. 1)

To best deflect sparks away from surrounding persons and materials, loosen the screw (B), adjust the spark deflector (C) and then retighten screw.

CAUTION: Risk of property damage. Do not allow cordset to come into contact with deflector or sparks as damage to cordset may occur.

Vise Operation (Fig. 5)

This is a quick travel feature. To release the vise (F) when it is clamped tightly, turn the crank (H) counterclockwise one or two times to remove clamping pressure. Lift the vise lever (I) up. Pull crank assembly out as far as desired. The vise may be shoved into work or cranked. Lower vise lever then tighten vise on work by using crank.

Fence Operation (Fig. 5)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

The fence (E) requires no tools to adjust. The quick-release clamp lever (T) unlocks and locks the fence. When the lever is rotated fully forward, the fence is unlocked. The fence can then be freely moved forward, backward or rotated to adjust for the best cutting position for a new wheel and as the wheel wears.

Rotating the lever fully to the rear locks the fence in position selected. If the bottom leg of the lever is not horizontal (parallel to the base), the fence is not locked. Lever will only lock fence when there is strong resistance to moving it to rear. If resistance is light, adjust clamping force by tightening slightly the two bolts (R) holding the fence to the base. Test fence by making several cuts.

Fence Angle Adjustment (Fig. 6)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

The angle adjustment indicator is part of fence clamping system. Align the desired angle with the edge of the base.

FOR A MORE ACCURATE SQUARE CUT

1. Unlock the fence.
2. Push the arm down until the wheel extends into the base.
3. Place a square against the wheel and adjust the fence against the square.
4. Lock fence into position.

Usage (Fig. 1, 2)

Refer to Figure 2 for proper body positioning during use.

To start the tool, depress the trigger switch (M). To turn the tool off, release the trigger switch. Keep hands and material free until wheel comes to a stop.

To prevent unauthorized use of tool, install a standard padlock (not included) into the padlock hole (N) located in the trigger.

Removal and Installation of Wheels (Fig. 7)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

The Quick-Change blade clamp requires no tools to change the blade.

1. Push in wheel lock lever (J) and rotate wheel (J) by hand until wheel lock lever engages slot in inside flange (S) to lock wheel. Loosen the Quick-Change blade clamp (Q) counterclockwise. Clamp has right-hand thread.
2. Remove the Quick-Change blade clamp (Q), blade clamp washer (U) and old wheel (J) by hand.

FIG. 6: ANGLE ADJUSTMENT INDICATOR

INDICATEUR DE RÉGLAGE DE L'ANGLE
 INDICADOR DE AJUSTE DE ÁNGULO

3. Make sure flange surfaces are clean and flat. Install the new abrasive wheel by reversing the above steps.
4. Tighten the Quick-Change blade clamp clockwise until the knob clicks at least three times to ensure the knob is tight. The Quick-Change blade clamp cannot be overtightened.

NOTE: A keyed blade clamp system which includes a blade bolt and blade bolt washer, (Fig. 7 Q, P) is available at extra cost from your local dealer or authorized service center. Please call 1-800-4-DEWALT (1-800-433-9258) for more information. When using the keyed blade clamp system, do not overtighten bolt.

WARNING: Risk of personal injury. Check the work surface that the chop saw rests on when replacing with a new abrasive wheel. It is possible that the wheel may contact ANY ITEMS OR STRUCTURE THAT EXTENDS ABOVE work surface (under the base) when the arm is fully lowered.
